

# What does Ecocivilisation mean for me?

# What does Ecocivilisation mean for me?

# What does Ecocivilisation mean for me?

# What does Ecocivilisation mean for me?

EGO to ECO

it is for me a society that lives by rules that help everyone and evolves in line with sustainable development to keep the planet as beautiful as we enjoy it for future generations

engage and act together

Future of our society. Better place for us and our children. Opportunity for our world. Makes me think about the challenge, how to get there, how to get this knowledge and way of thinking to wider society...

show them how it works for me

bring up my children in this mindset: being part of the greater good - be kind !

it is for me a society that lives by rules that help everyone and evolves in line with sustainable development to keep the planet as beautiful as we enjoy it for future generations

harmonious co existence of human and universe

find shared projects

# What does Ecocivilisation mean for me?

change my mobility patterns

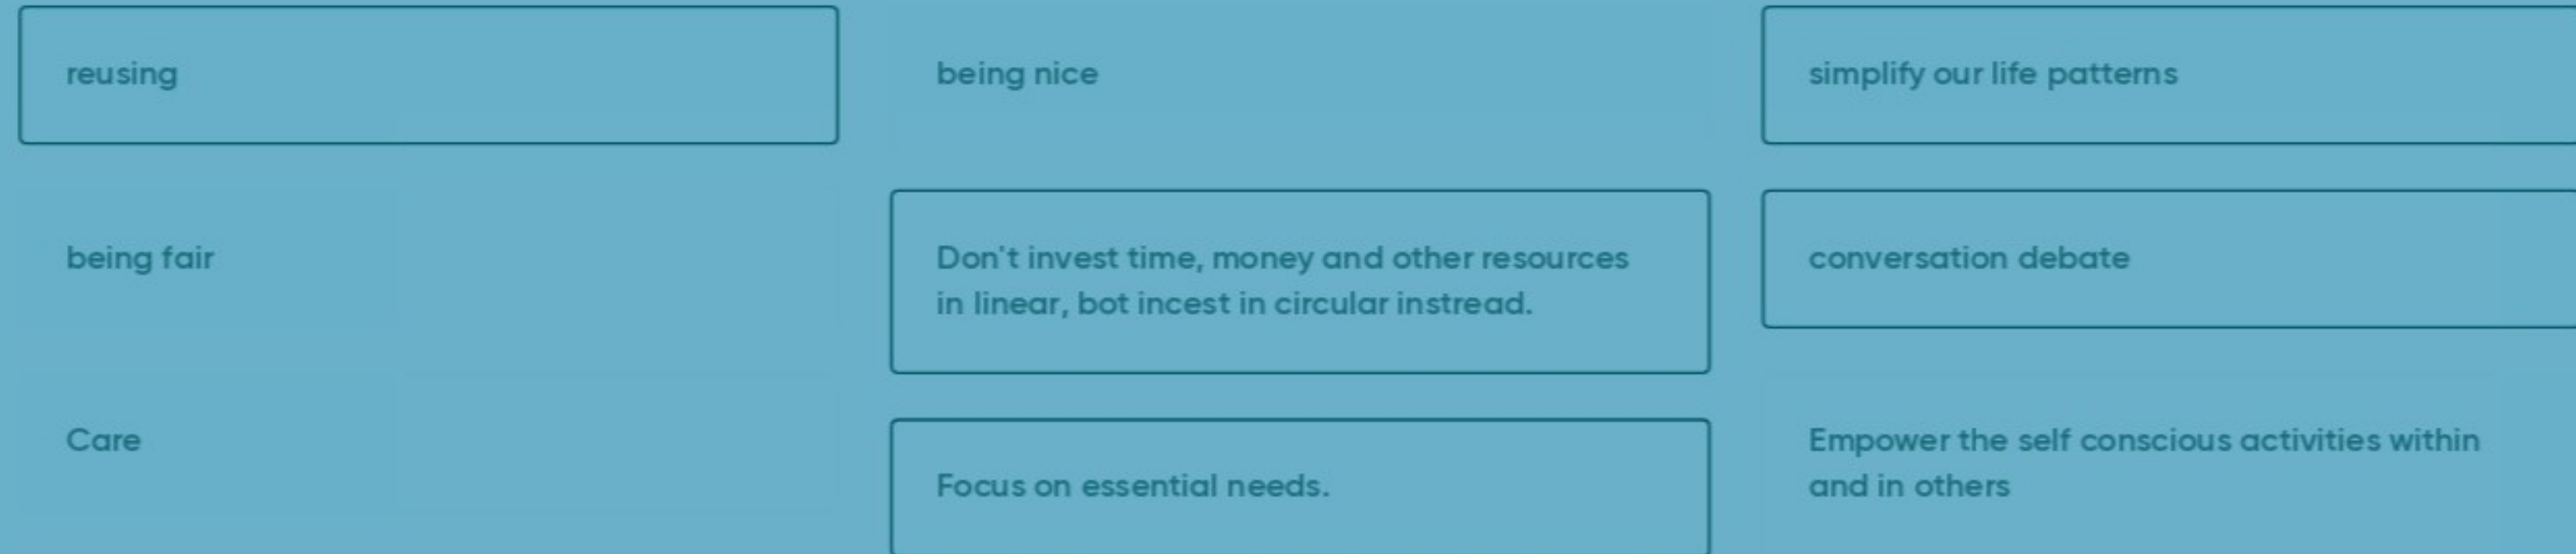

speaking up in favour of circular economy based on personal experience and projects that deliver

making people walk around in this better future to give them a positive vision

# What could I do with my family and friends to accelerate the journey towards Ecocivilisation?

# What could I do with my family and friends to accelerate the journey towards Ecocivilisation?

not excluding ppl

Have meaningful conversations around our understanding about it.

Discuss the idea

Self-awareness, inner peace among friends, family

be an example of solution!

It is all about awareness...

Create a mindset of making decisions thinking about what surrounds us

planting garden, kind and caring relationship, dedication to open dialogues,

being responsible, emphatetic

# What could I do with my family and friends to accelerate the journey towards Ecocivilisation?

Care for use of natural resources, care for all other people around us, conscious and responsible daily decisions, love to ourselves and everyone around.

show by example this u-turn approach towards respect of human beings and environment

Buy just what we need  
Reusing  
Second hand  
Eco

to come up with the shared family vision and based on that vision live the life - balanced. To discuss the needs of all members equally.

Try to steer them and myself on the right path

# What could I contribute professionally to accelerate the journey towards Ecocivilisation?

To share the landscape of the Ecocivilisation (Violeta's model) in different workshops that we hold for our clients. To share it online on our portal [navdihni me /inspire me](#)

Connect with different stakeholders

Do business the way that helps regenerate society and the planet.

fair trade and compassion

allow others to dream

Taking conscious decisions, being part of conscious organisation, participate, share, collaborate, care with others.

DISCOVER NEW PATHS

teach about and be an example

Sustain Culture Centric Organisation

# What could I contribute professionally to accelerate the journey towards Ecocivilisation?

change the mobility pattern

It is all about knowledge, awareness.. to encourage others to transform from EGO to ECO...

build sincere relationships

as an HR pro to amplify in practice all the theories regarding CSR and fair treatment, education, sustainability

Share Violeta's model, envision this ecocivilization

bring forward as often as possible good case practices, and my own experiences in favour CE

Business model franchise that creates an inclusive society

be ready to abandon the conventional and dip into the new, meaningful ways of cooperation.

Mind relationships.

# What could I contribute professionally to accelerate the journey towards Ecocivilisation?

acting local

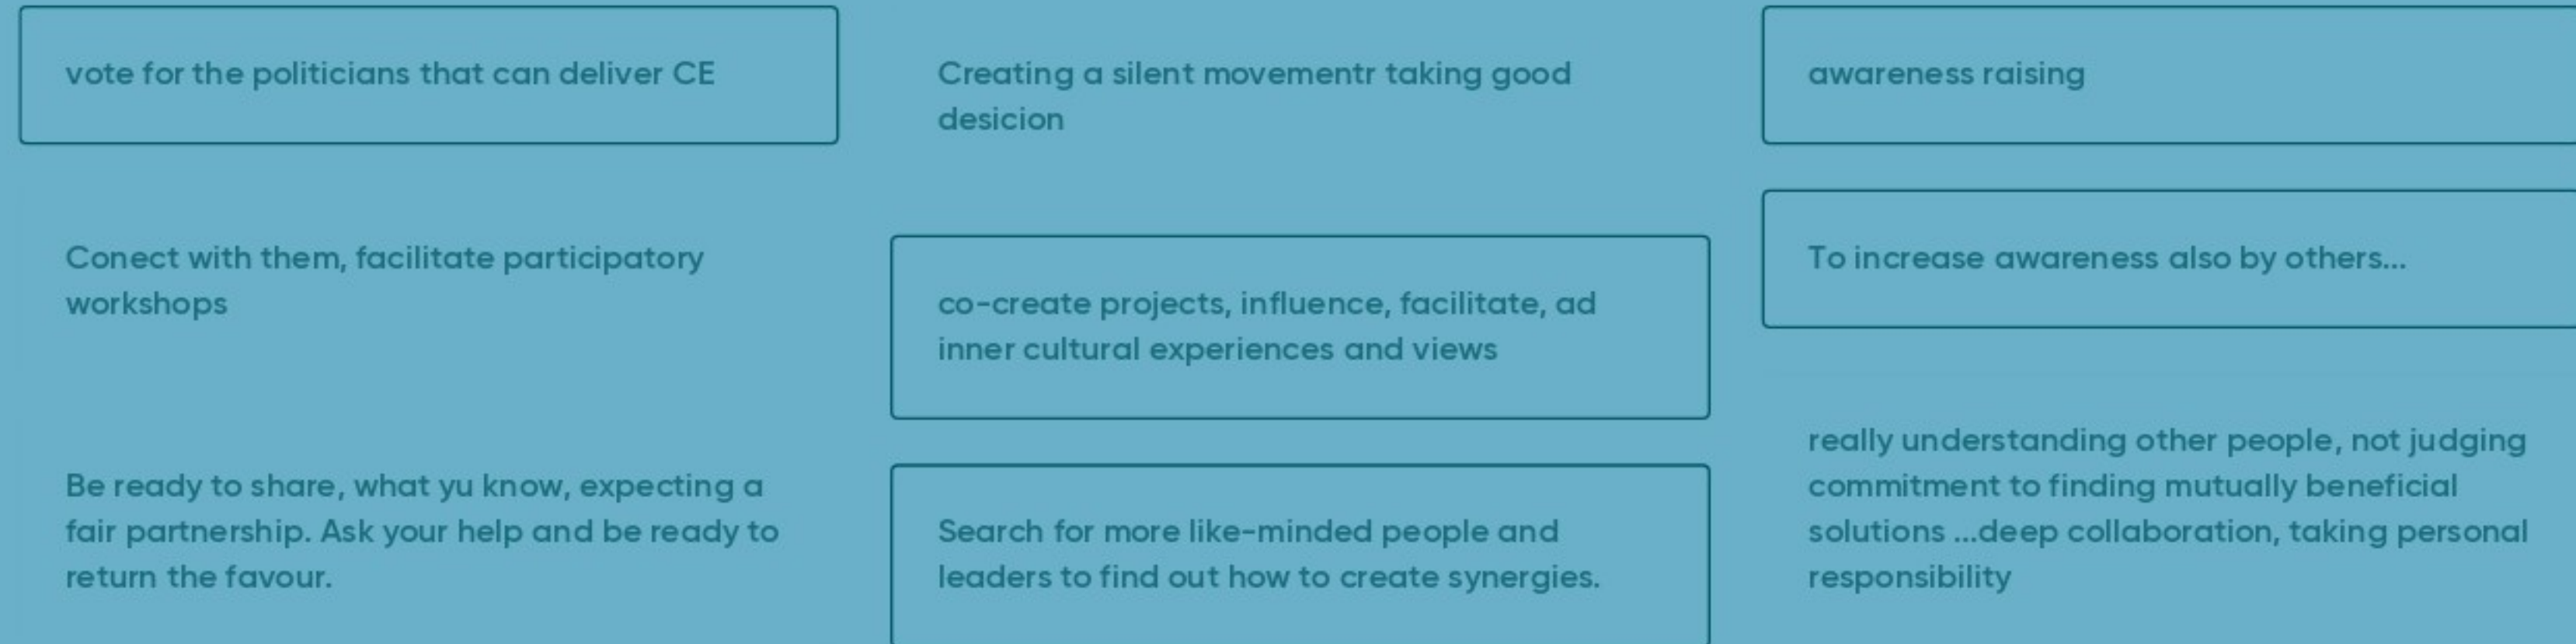

To ask several times if a product/ service is really needed, what impact it has, is it fair...

connections and collaboration to strengthen relational focus in medicine

# How could I collaborate with (potential) partners to accelerate the journey towards Ecocivilisation?

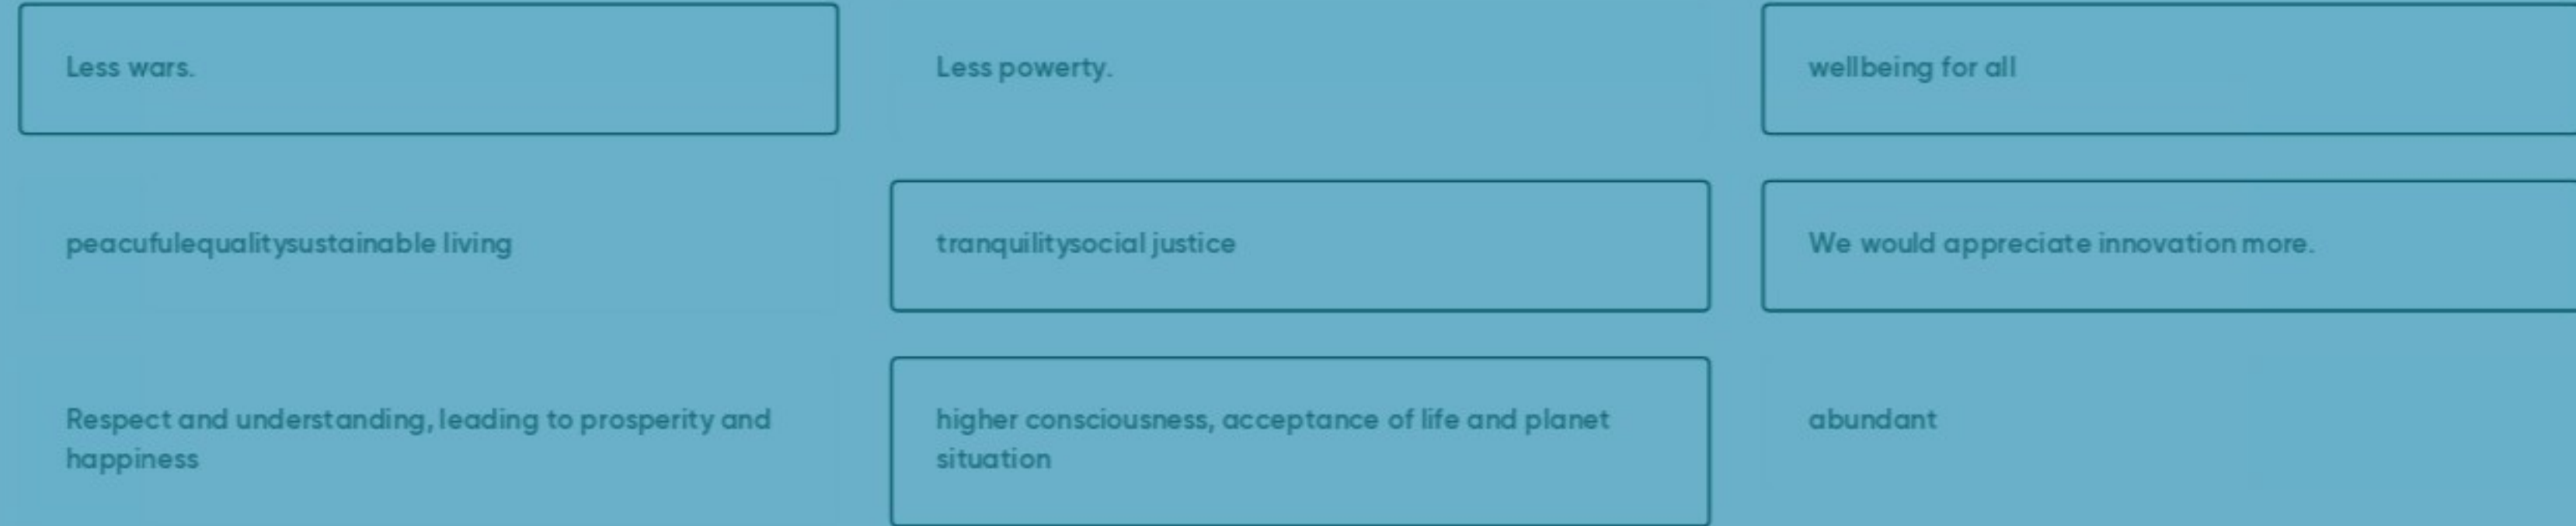

# How could I collaborate with (potential) partners to accelerate the journey towards Ecocivilisation?

# How could I collaborate with (potential) partners to accelerate the journey towards Ecocivilisation?

# In what ways our society will be different if we have achieved Ecocivilisation?

# In what ways our society will be different if we have achieved Ecocivilisation?

# In what ways our society will be different if we have achieved Ecocivilisation?

kind, compassionate and willing to listen and help each others also spiritually not only materially!

better communication

engaged participation

better and sincere networks

A thriving planet, people reaching their potentials, wellbeing, more health, beautiful, healthy environment, peace, less suffering - more purpose and collaboration, more creativity for common good

no racism

We will appreciate people over "crematiscic" results. - Piling up of resources will become useless.

new priorities: land, society, beings

We will have better option to survive and leave world for future generations.

# In what ways our society will be different if we have achieved Ecocivilisation?

It will be much more healthy and happy

restoration

We will get back natural environments that has been vanishing...

Slow down and stop climate change.

We will take from nature only what we really need.

Human civilisation will become regenerative to the nature.

I will reduce flying; further reduce driving a car and cycle more. I will further reduce packaging. I will reduce the purchasing of clothes and other necessities to the level of replacement - and below.

# What would this mean for our planet, natural environment if we have achieved Ecocivilisation?

no more extinction of different species

abundance, peace

potable water everywhere

enough food

slowed down use of natural resources

harmony with nature

Rebirth

they would cause a slow restoration of the earth and the people

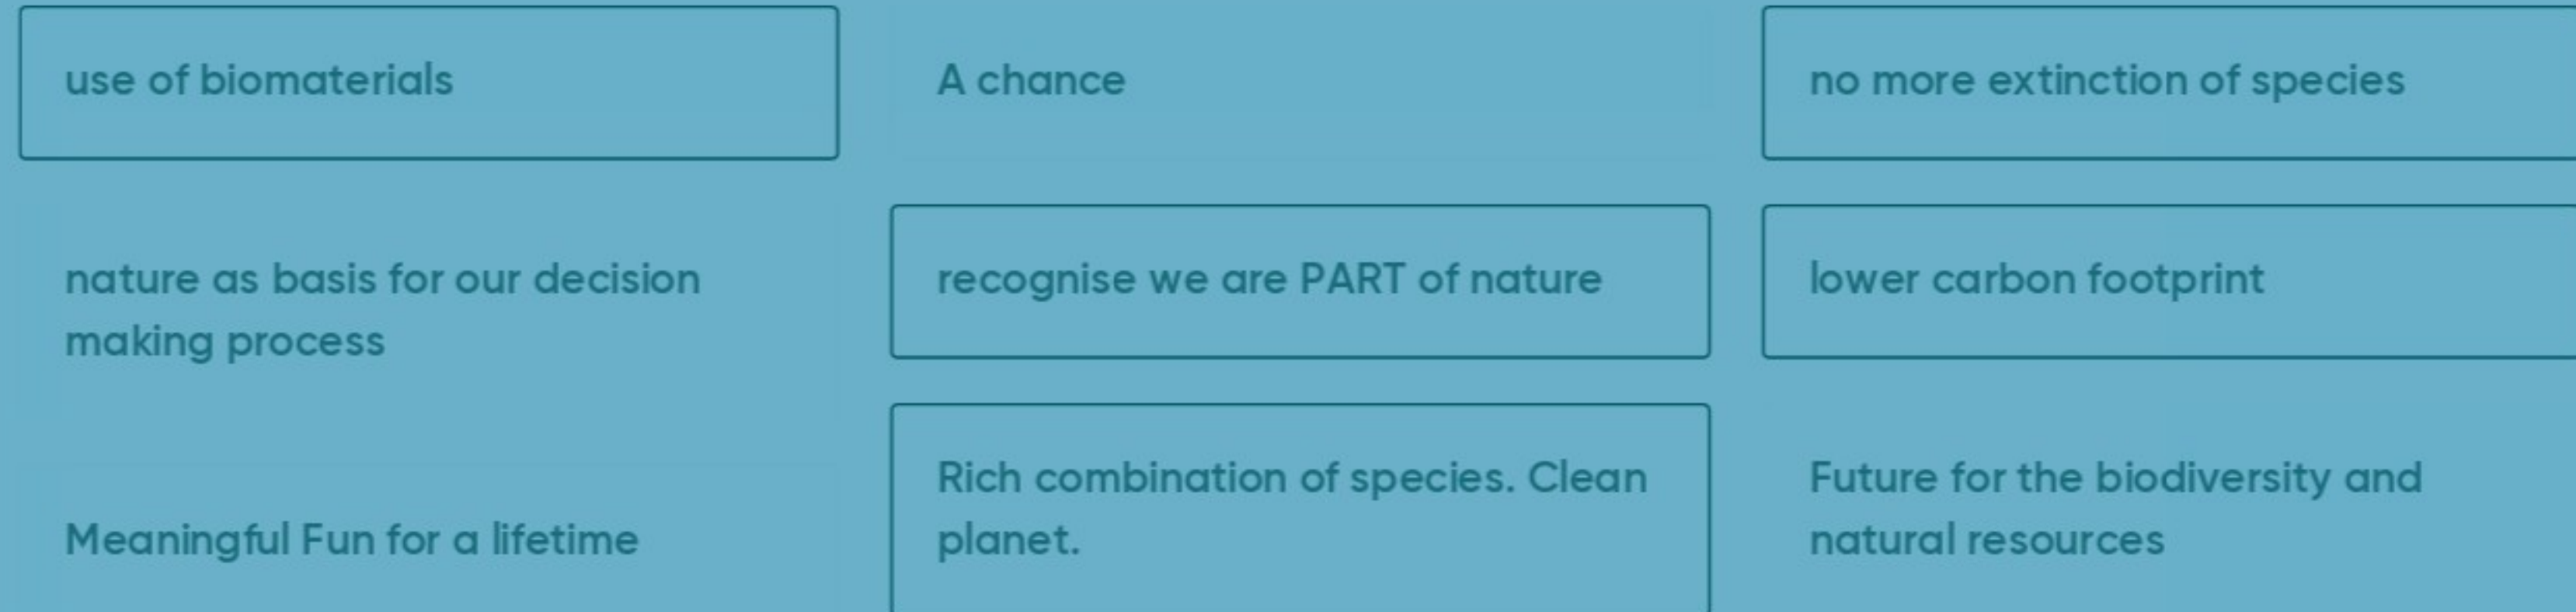

quality of life in respects to environment

# What would this mean for our planet, natural environment if we have achieved Ecocivilisation?

# What would this mean for our planet, natural environment if we have achieved Ecocivilisation?

# Which action / small step can I take tomorrow to accelerate the journey towards Ecocivilisation?

plant even more vegetables in my garden	connect with people, spread info, vision and start doing on projects	reuse clothes
smile to coworkers	using this great learning to develop regenerative shipping	Take responsibility as consumer
check option for buying electric car	I will start coaching my clients on the meaning of ecocivilisation - and agree with them on their first step - make them evangelist of the ecocivilisation in the future	share the concept of ecocivilisation with others

# Which action / small step can I take tomorrow to accelerate the journey towards Ecocivilisation?

Work on the article on Anthropocene and medicine.  
Connect with a colleague and discuss a coming webinar on the Ecocivilisation

In our household we are quitting with preprocessed food.

use less plastics

Tray to grow up more organic food to be more undependable...

Reduction of waste in the office, Utilising things instead of throwing in trash

Be an ambassador of Ecocivilization

today as individuals we can redesign our lifestyles from the way we eat, consume, work, teach our kids to how we dream our late years

teach kids to reuse

Start connecting with the first potential partners.

# Which action / small step can I take tomorrow to accelerate the journey towards Ecocivilisation?

spread the word ecocivilisation
