ECOCIVILISATION

More than just a hope, more than just
a dream, more than just you and I.
It is possibly a ticket for our existence.

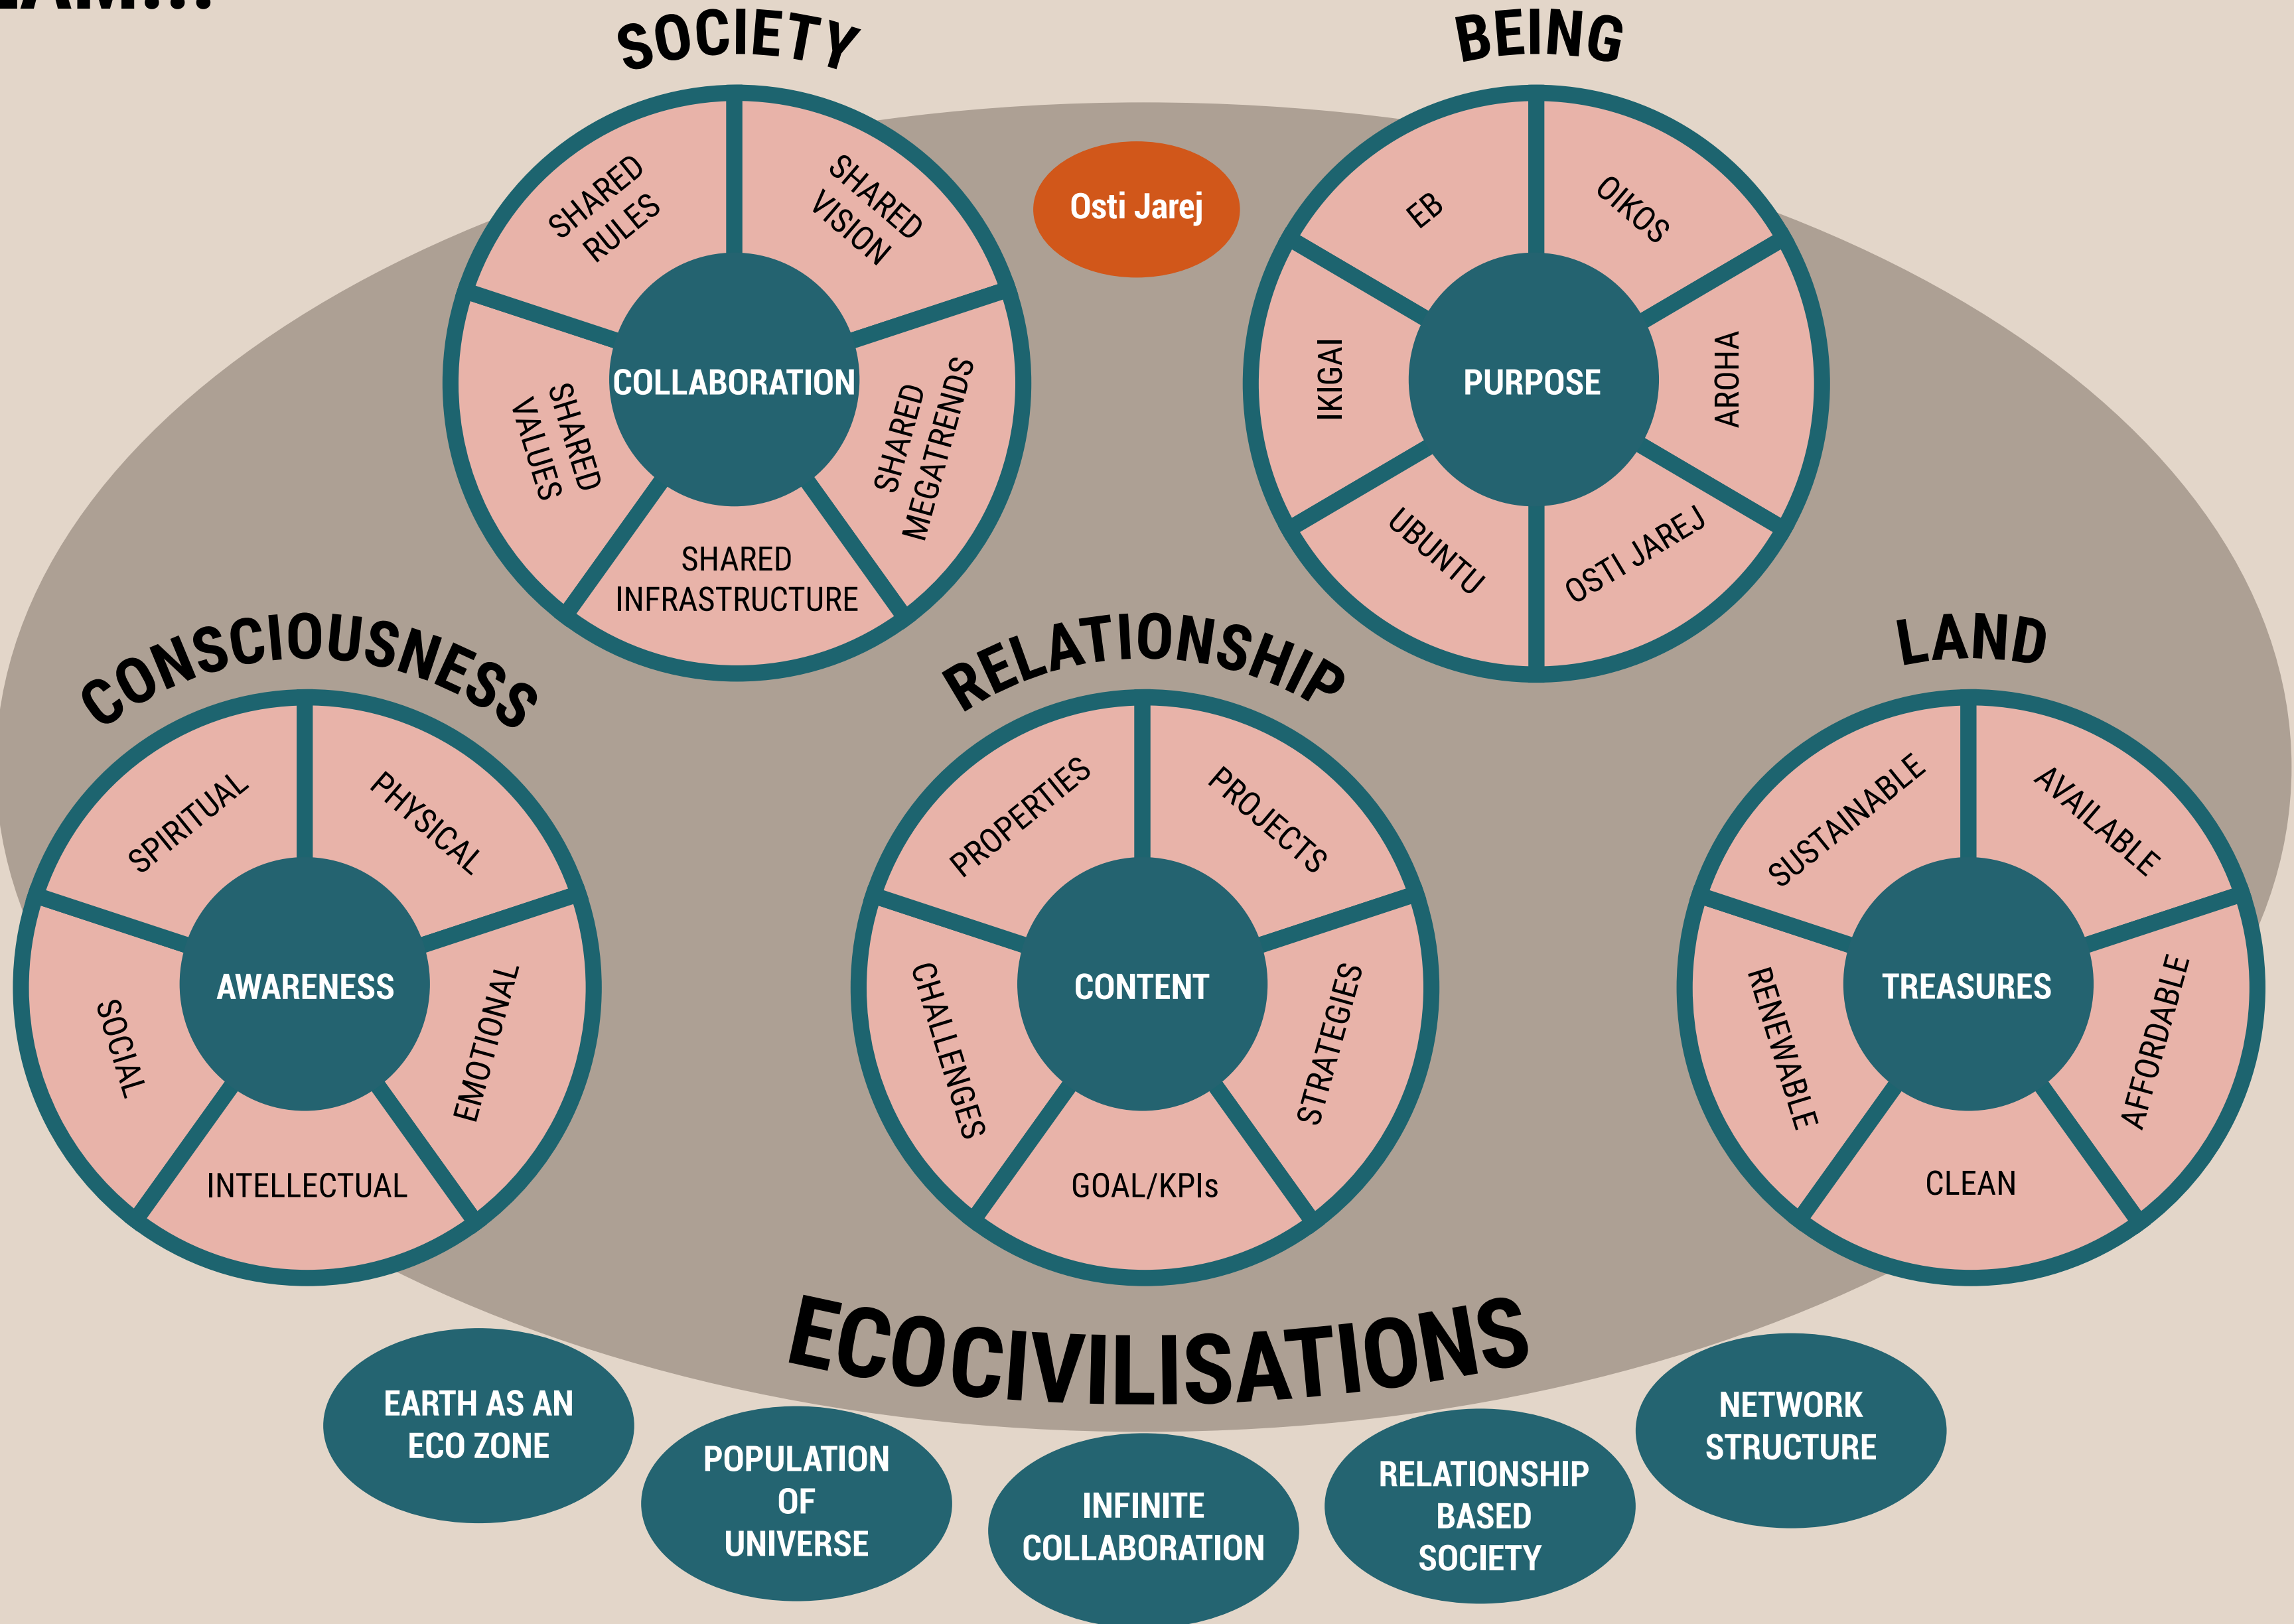

I HAVE A DREAM...

What is so different about this dream?

“It is a global movement that has no name, no leader, no coordinated actions. It is coming from within. More and more of us are feeling it, sensing it, acting upon our inner calling.

We know that it is time to live differently. To be more connected to the living world around us. To be in balance with the Planet, the Universe, with ourselves and our fellow humans. We decided to embark upon this journey. What about you?”

I HAVE A DREAM...

CONCEPTS TO ADDRESS

1. Discussion about the entity "Relationships"

First Webinar in a series on Ecocivilisation with Anne Berner on **technology**:

"The immense amount of data being created every day by the common use of digital devices and software by millions of citizens around the World"

The abundance of **data** creates many new **questions**, social **challenges** and unprecedented **opportunities**. The topic is calling for an indepth public discussions:

1. Concept of ownership (accountability and stewardship over assets for the next generation)
2. Where is the focus (ownership vs user's rights)
3. Ethical discourse on the 4th Industrial (R)evolution and AI (benefits of the humanity from tech development, digitalisation, use of data)
4. Balance between risks and opportunities (individual rights, corporate opportunity and responsibilities, social benefits and needs)

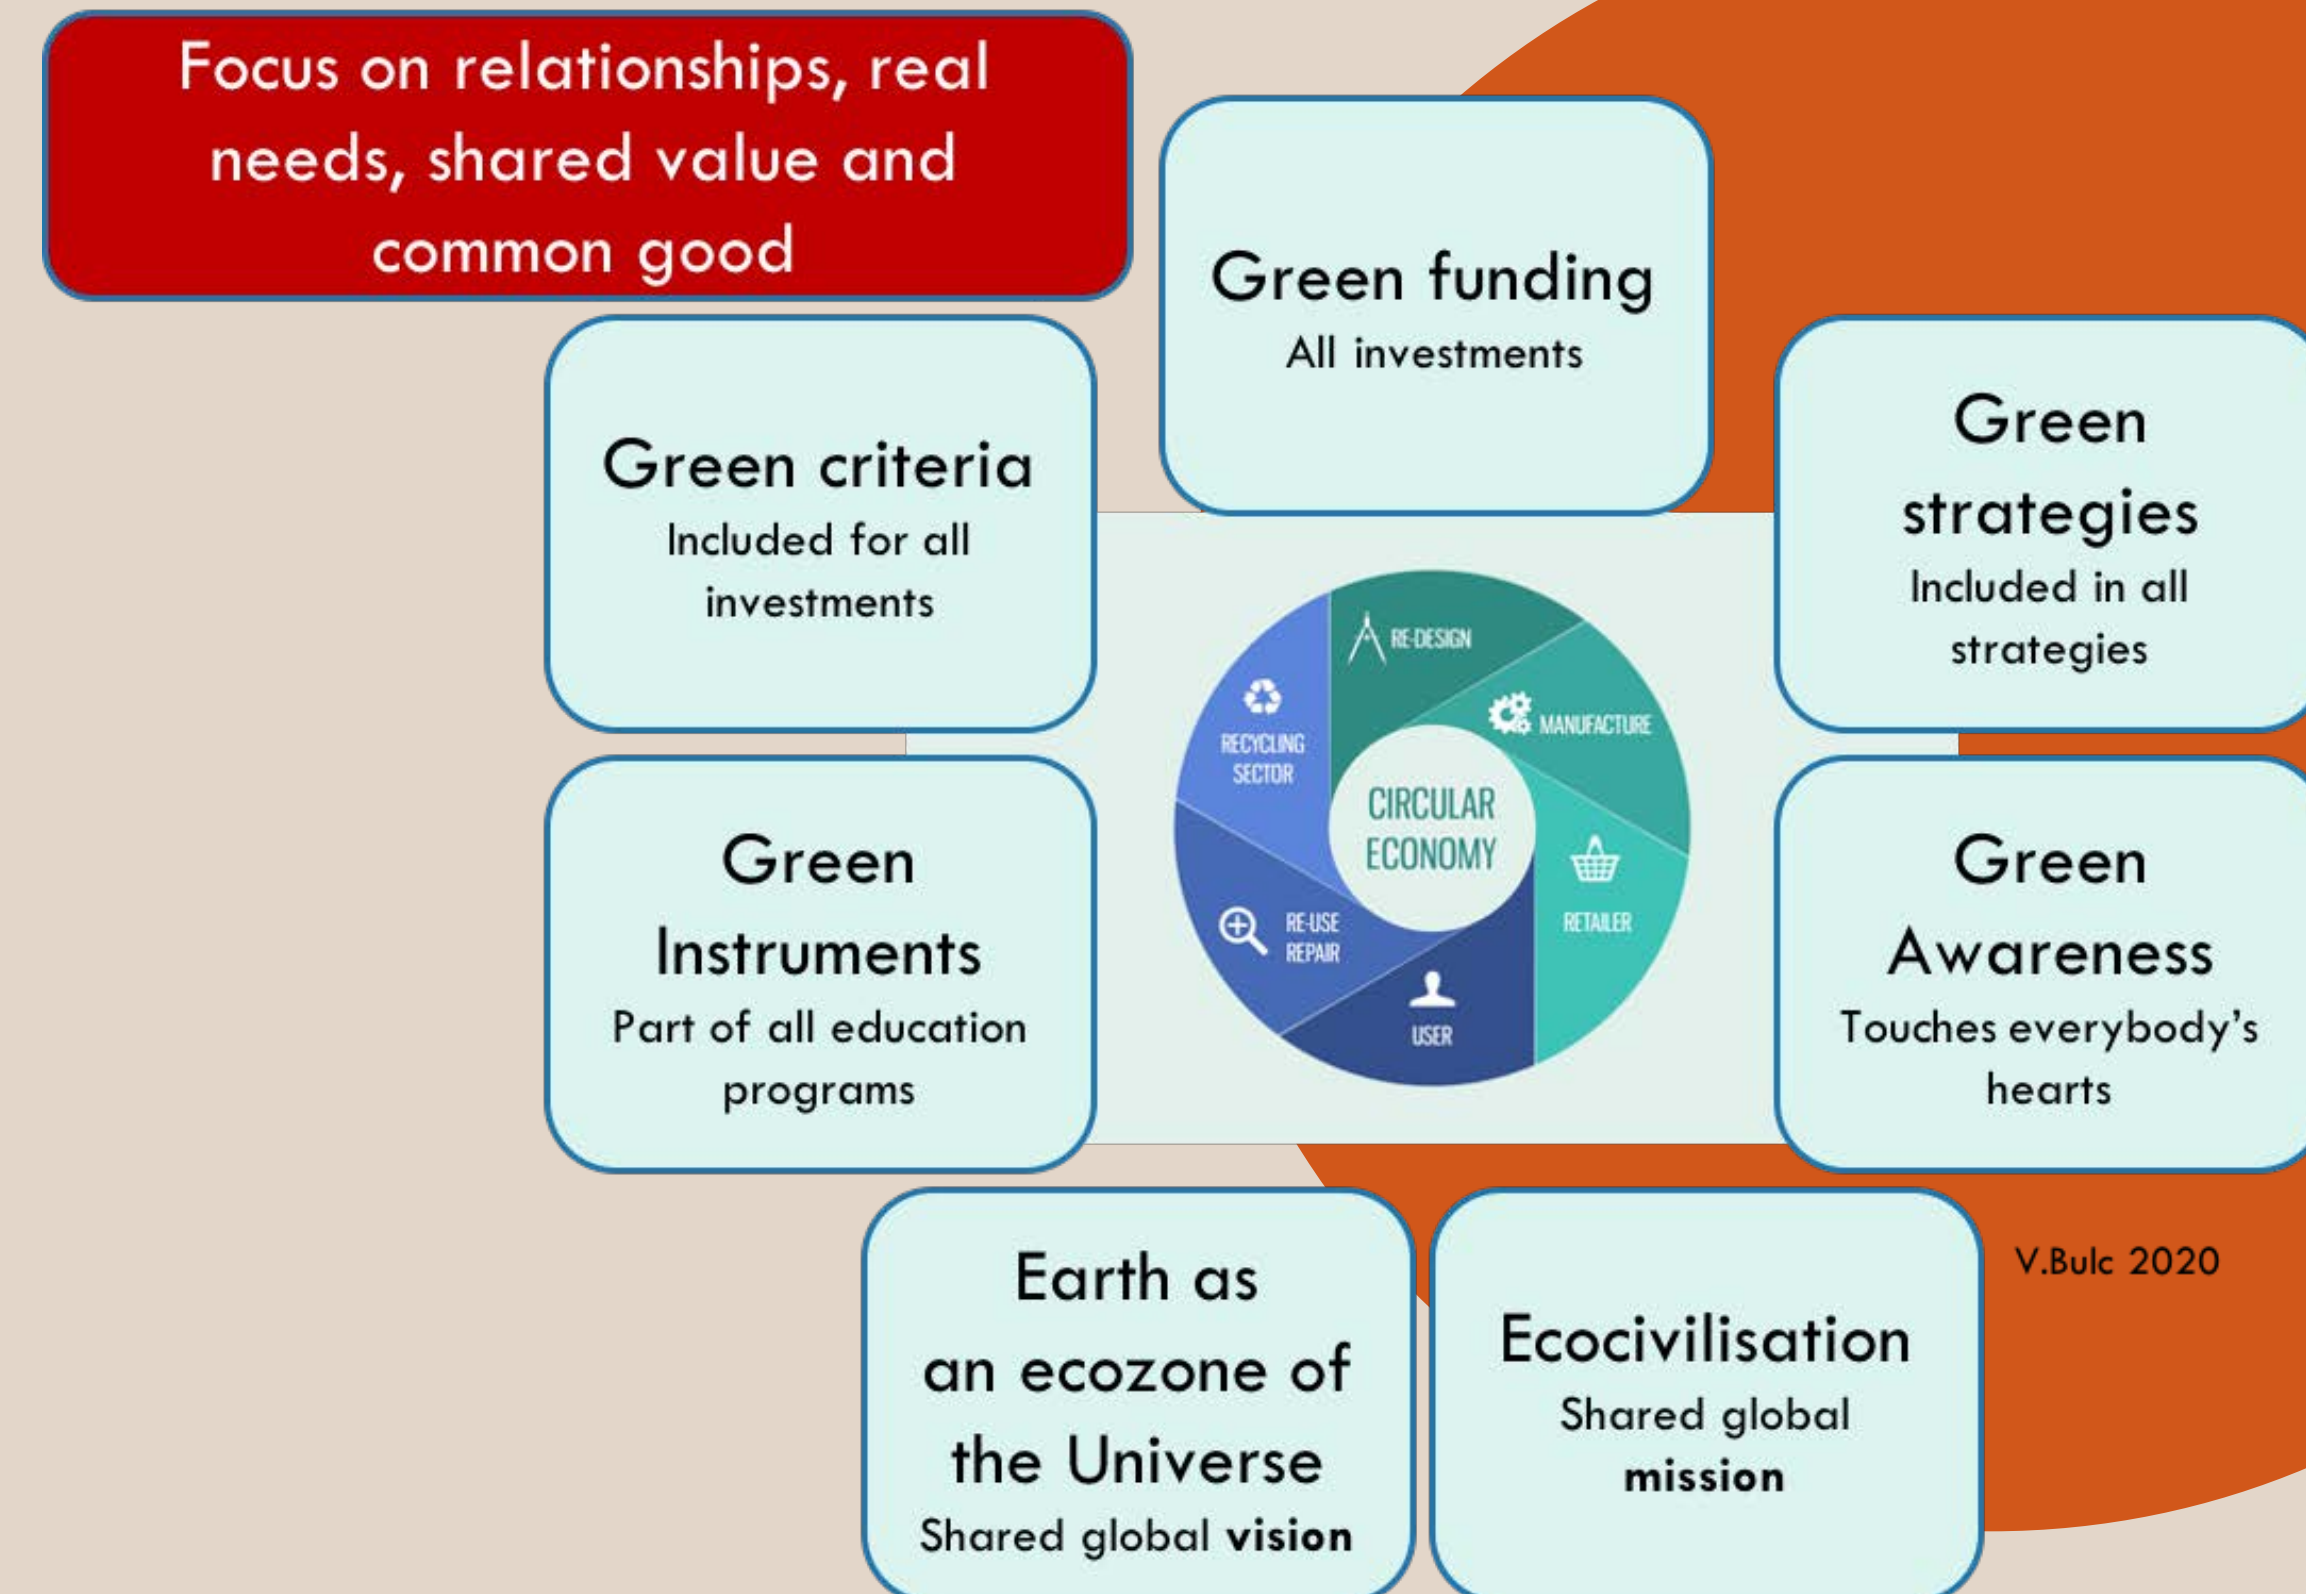

CONCEPTS TO ADDRESS

2. Discussion about the entity "Relationships"

Second webinar in a series on Ecocivilisation with Karin Huber Heim and Christiaan Kraaijenhagen on **circular economy**:

Circular Economy as the underlying relationship among the basic 3 entities:

- Beings
- Society
- Land

CONCEPTS TO ADDRESS

1. Discussion about the entity "Society"

Third Webinar in a series on Ecocivilisation with Carlo Giardinetti on **geopolitics and society**:

"How we urge to have a more organized approach to see the change we want and how we can get there."

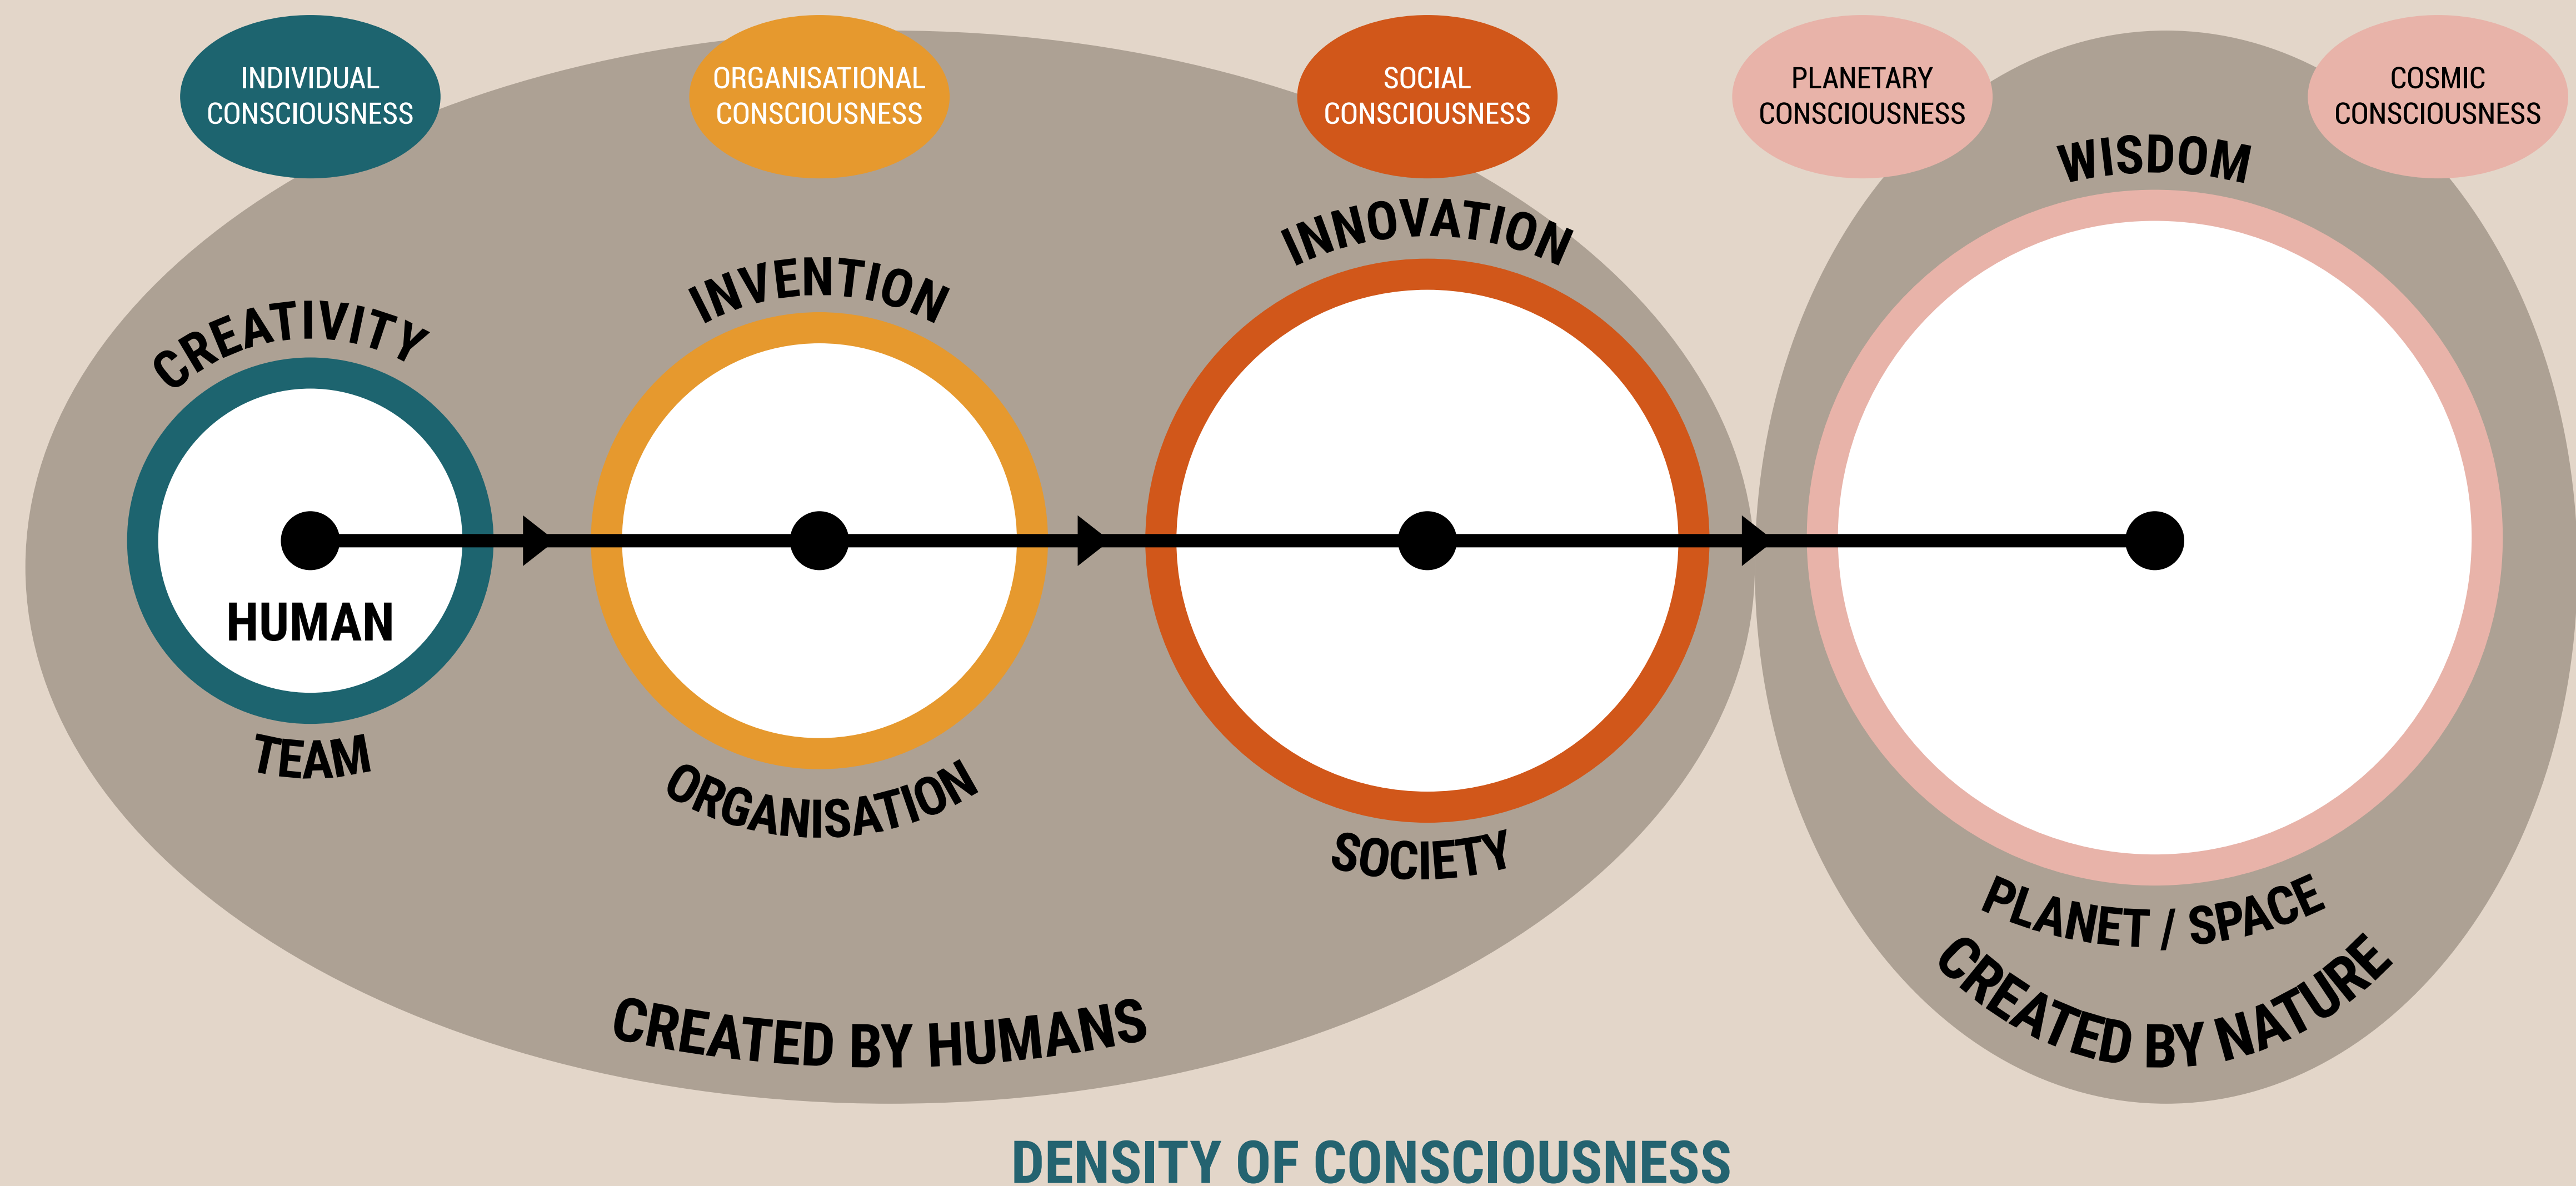

I HAVE A DREAM...

Society: a group of individuals involved in persistent social interaction, or a large social group, sharing the same spatial or social territory, typically subject to the same political authority and dominant cultural expectations. Societies are characterized by patterns of relationships (social relations) between individuals who share a distinctive culture and institutions. In the social sciences, a larger society often exhibits stratification or dominance patterns in subgroups. (Wikipedia)

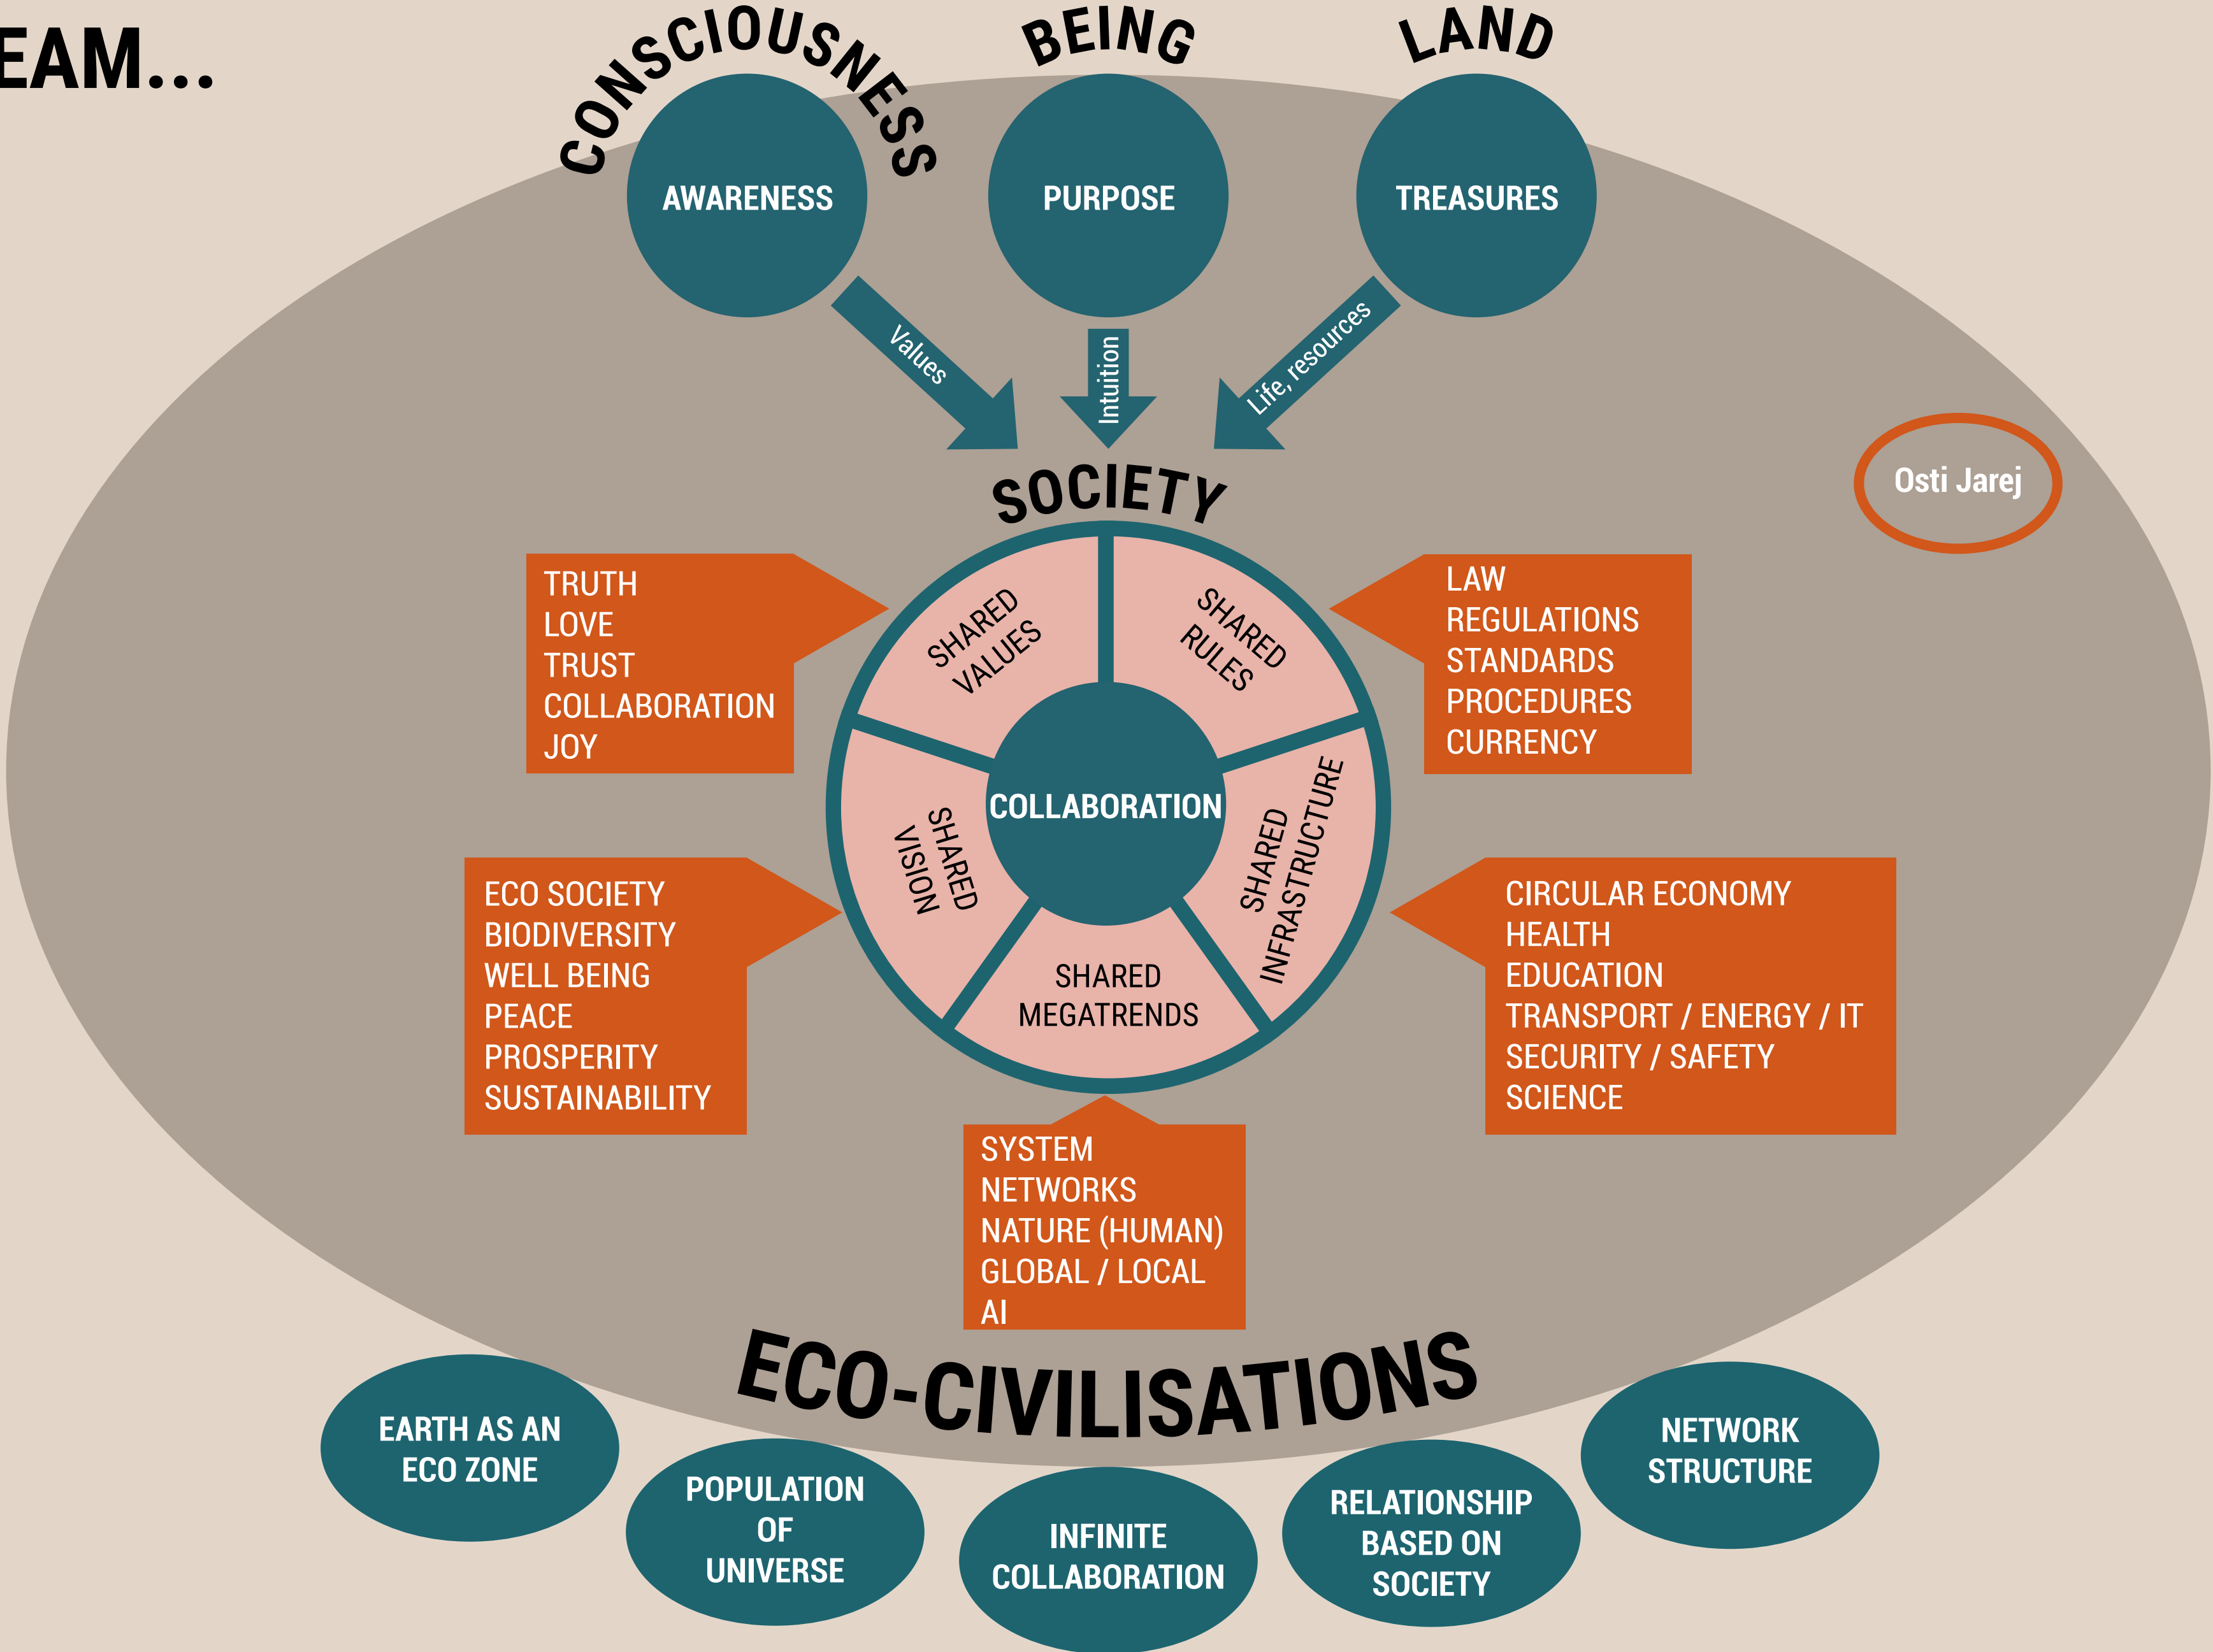

Geopolitics: politics is the study of the effects of Earth's geography (human and physical) on politics and international relations. (Wikipedia)

relationships
dominant culture
geography

MODELS OF SUSTAINABLE COHESION (MSC)

I HAVE A DREAM...

I HAVE A DREAM...

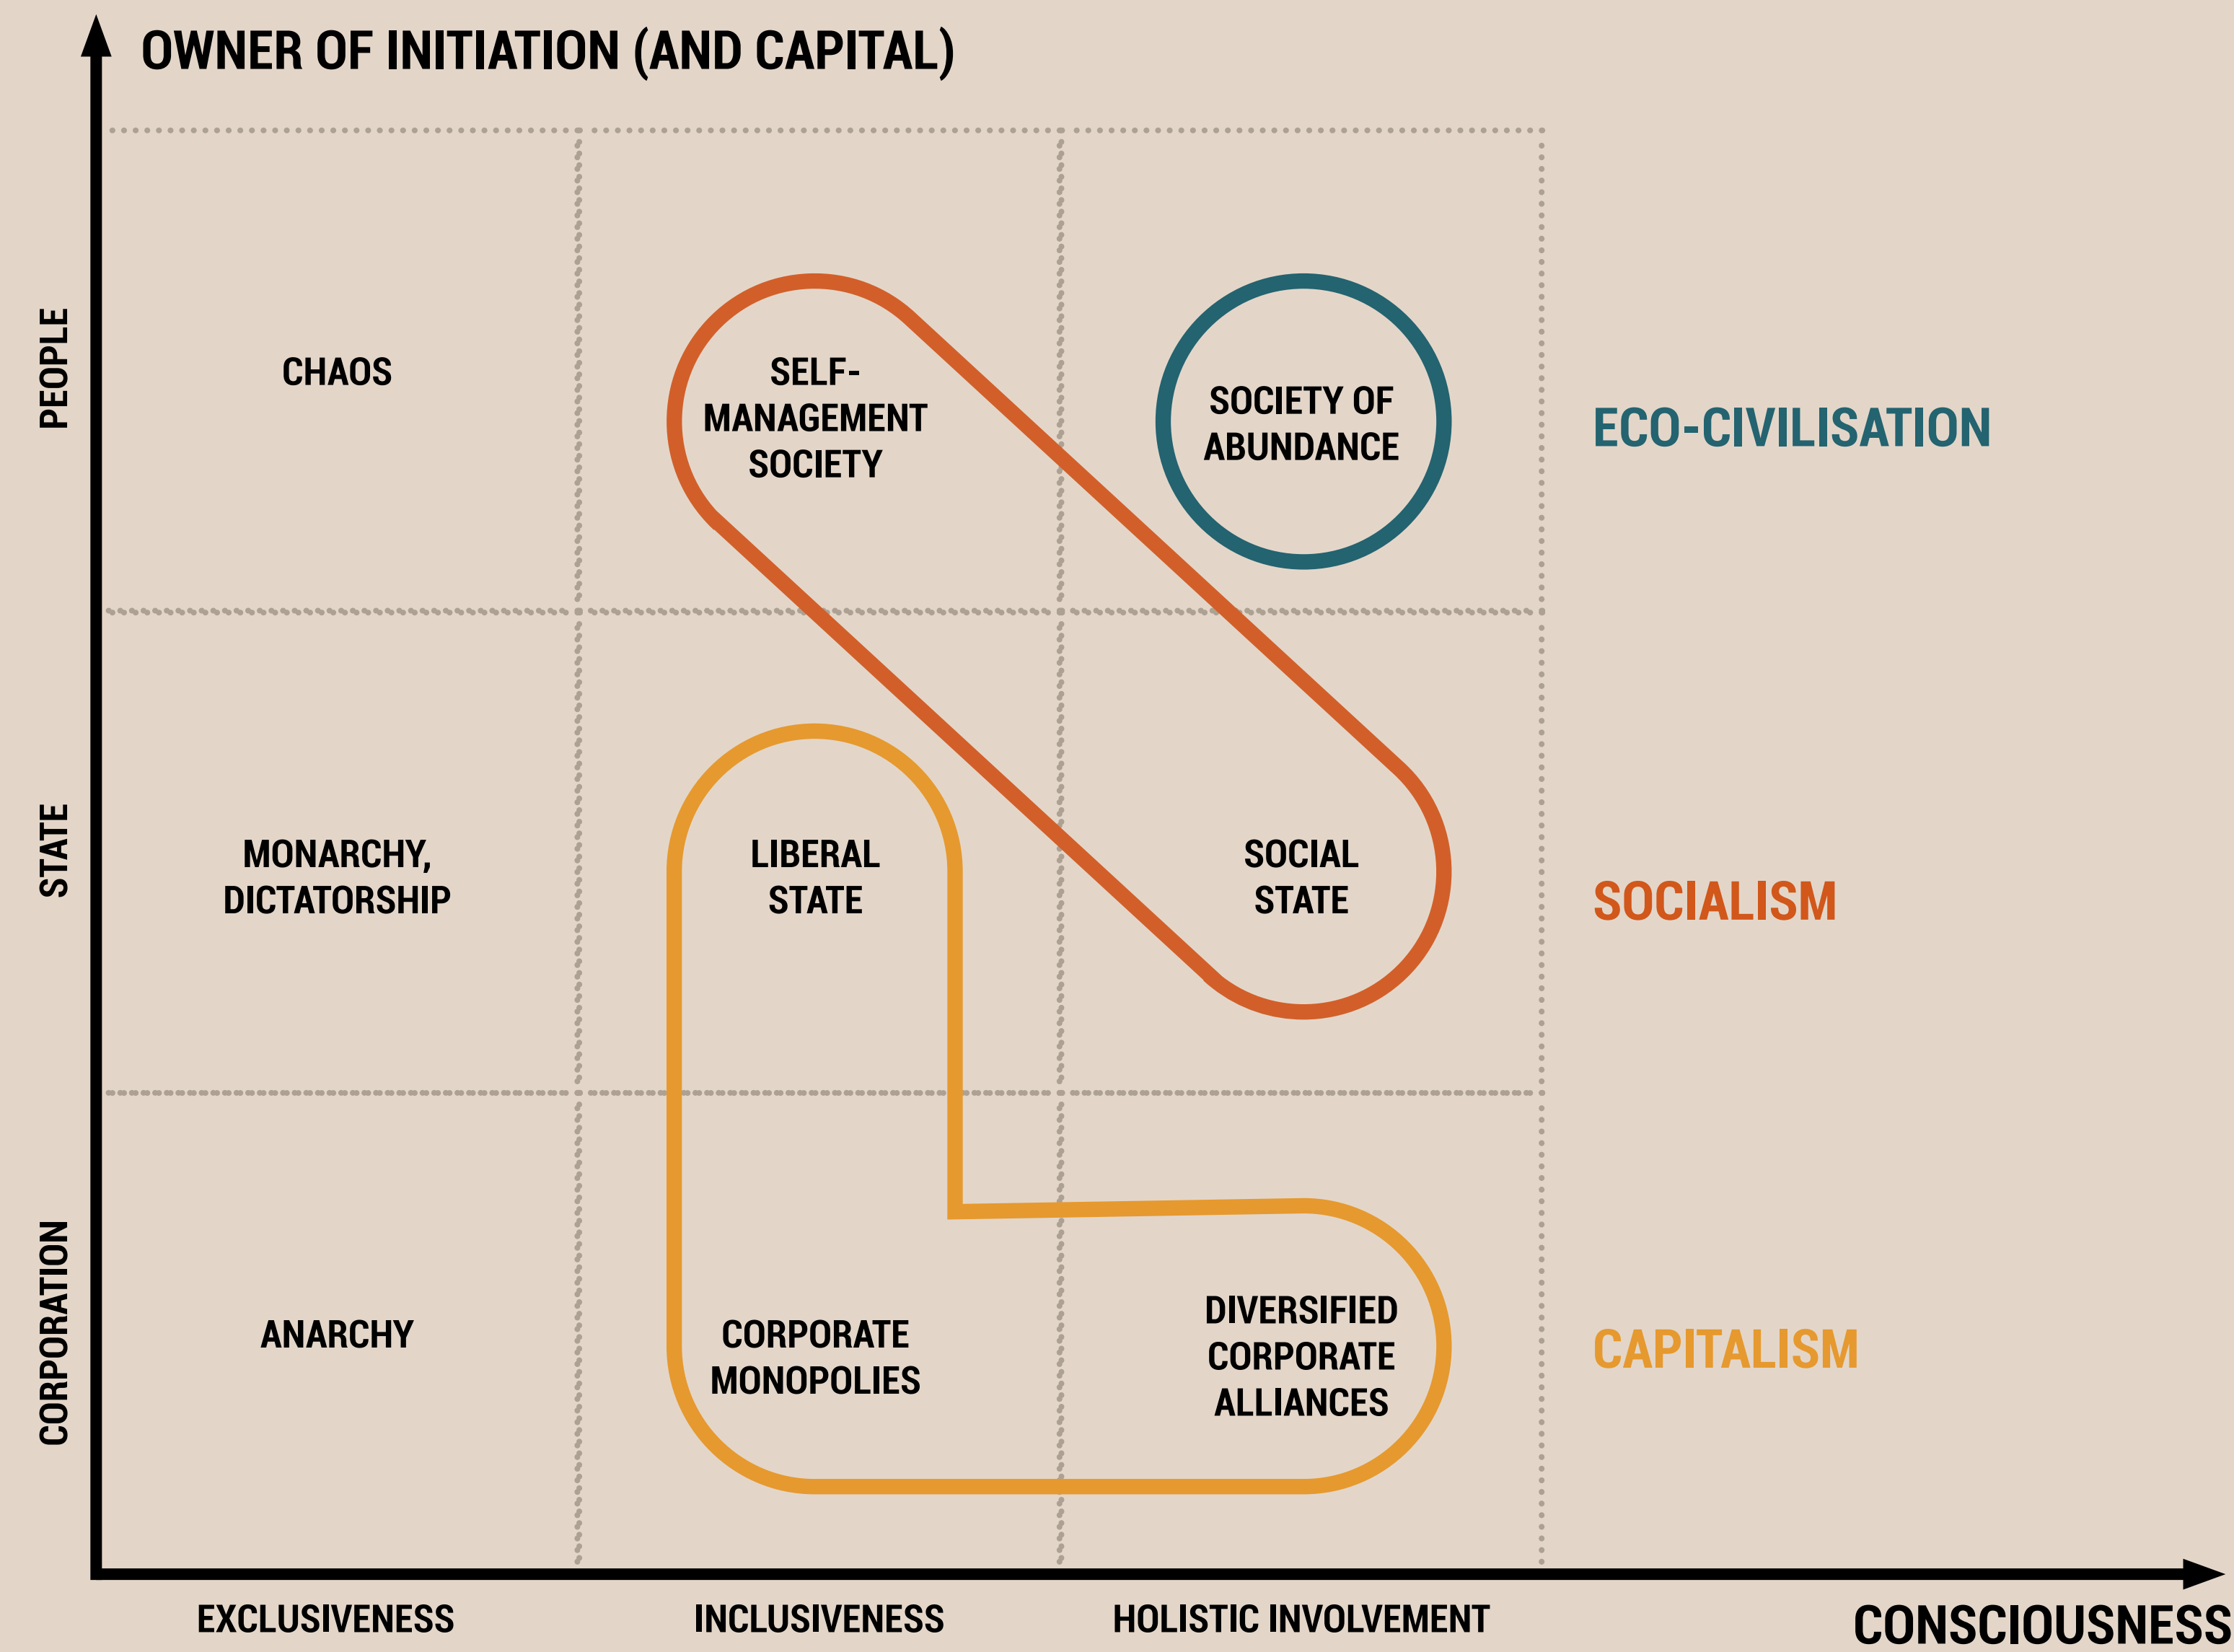

Ecocivilisation is emerging from a global consciousness,
driven by intuitive inspiration
and survival instinct...

Ecocivilisation and society, geopolitics:

is there a future for countries?
is there a future for nations?
is there a future for cultures?

do we need to look at the Planet Earth from a galactic point of view
can we emerge as one nation, are we made for One

EVOLUTION OF THE ORDER

MODELS OF ECOCIVILISATION

It is here,
The drums are calling,
let's awaken our senses, memories,
let's free our inner truths
and dare to go beyond.

THANK YOU!
