More than just a hope,
more than just a dream,
more than just you and I.

Why

IF WE WANT TO FIND A SUSTAINABLE ANSWERS TO THE MOST PRESSING MATTERS OF TODAY'S SOCIETY (POLLUTION, PANDEMICS, EXTENSIVE USE OF COMMON RESOURCES, UNKNOWN) WE NEED TO **COME TOGETHER** AND START **IMAGINING** THE **FUTURE** WE WANT TO LIVE IN.

A SHARED UNDERSTANDING OF A MORE **INTEGRAL CONCEPT** TOWARDS **SUSTAINABLE AND INCLUSIVE SOCIETY** IS CALLED FOR.

IMAGINING WHERE WE ARE HEADED CAN HELP US ALL TO SEE THE RIGHT MOVES ON OUR PATHWAY INTO THE FUTURE.

WE ARE TALKING ABOUT **»ECOCIVILISATION«** AS A NEW DESTINATION OF A COMMON SOCIETAL JOURNEY.

How - Hypothesis

By **imagining, developing and delivering** a new civilisational paradigm - Ecocivilisation.

This we can do – TOGETHER.

Ecocivilisation's potential **characteristics** could be the following:

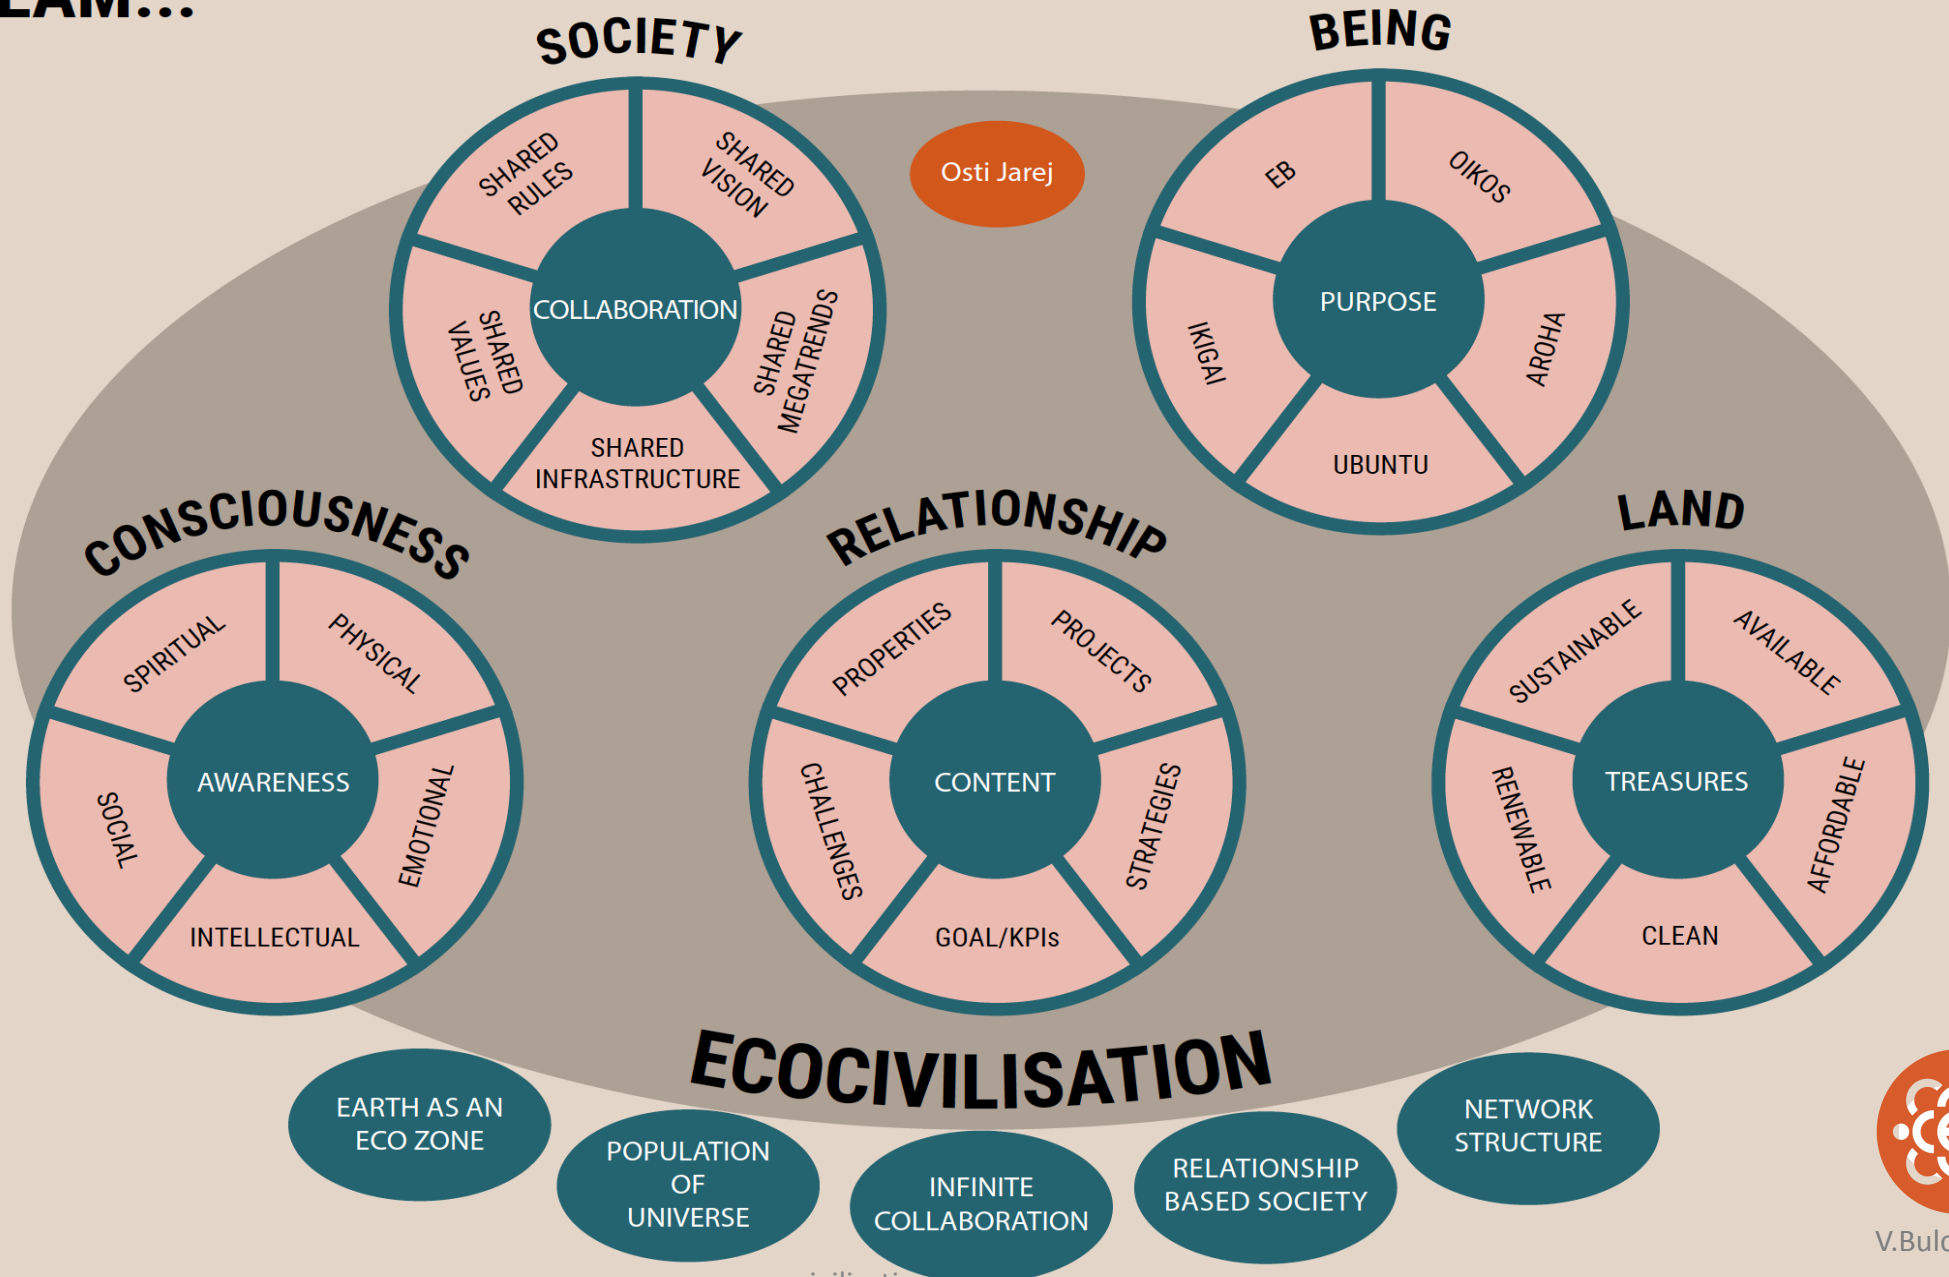

- It will emerge from a global/Planetary consciousness
- It will focus on 5 core entities: beings, societies/communities, land, consciousness, relationships
- It will emerge around 3 major goals:
 - Earth as an ecozone of the Galaxy
 - Population of other planets based on sustainable circular model
 - Discovery of a new law of physics
- Technology as a major driving force will be replaced by a new understanding of relationships as the building blocks of the civilisational structures

What

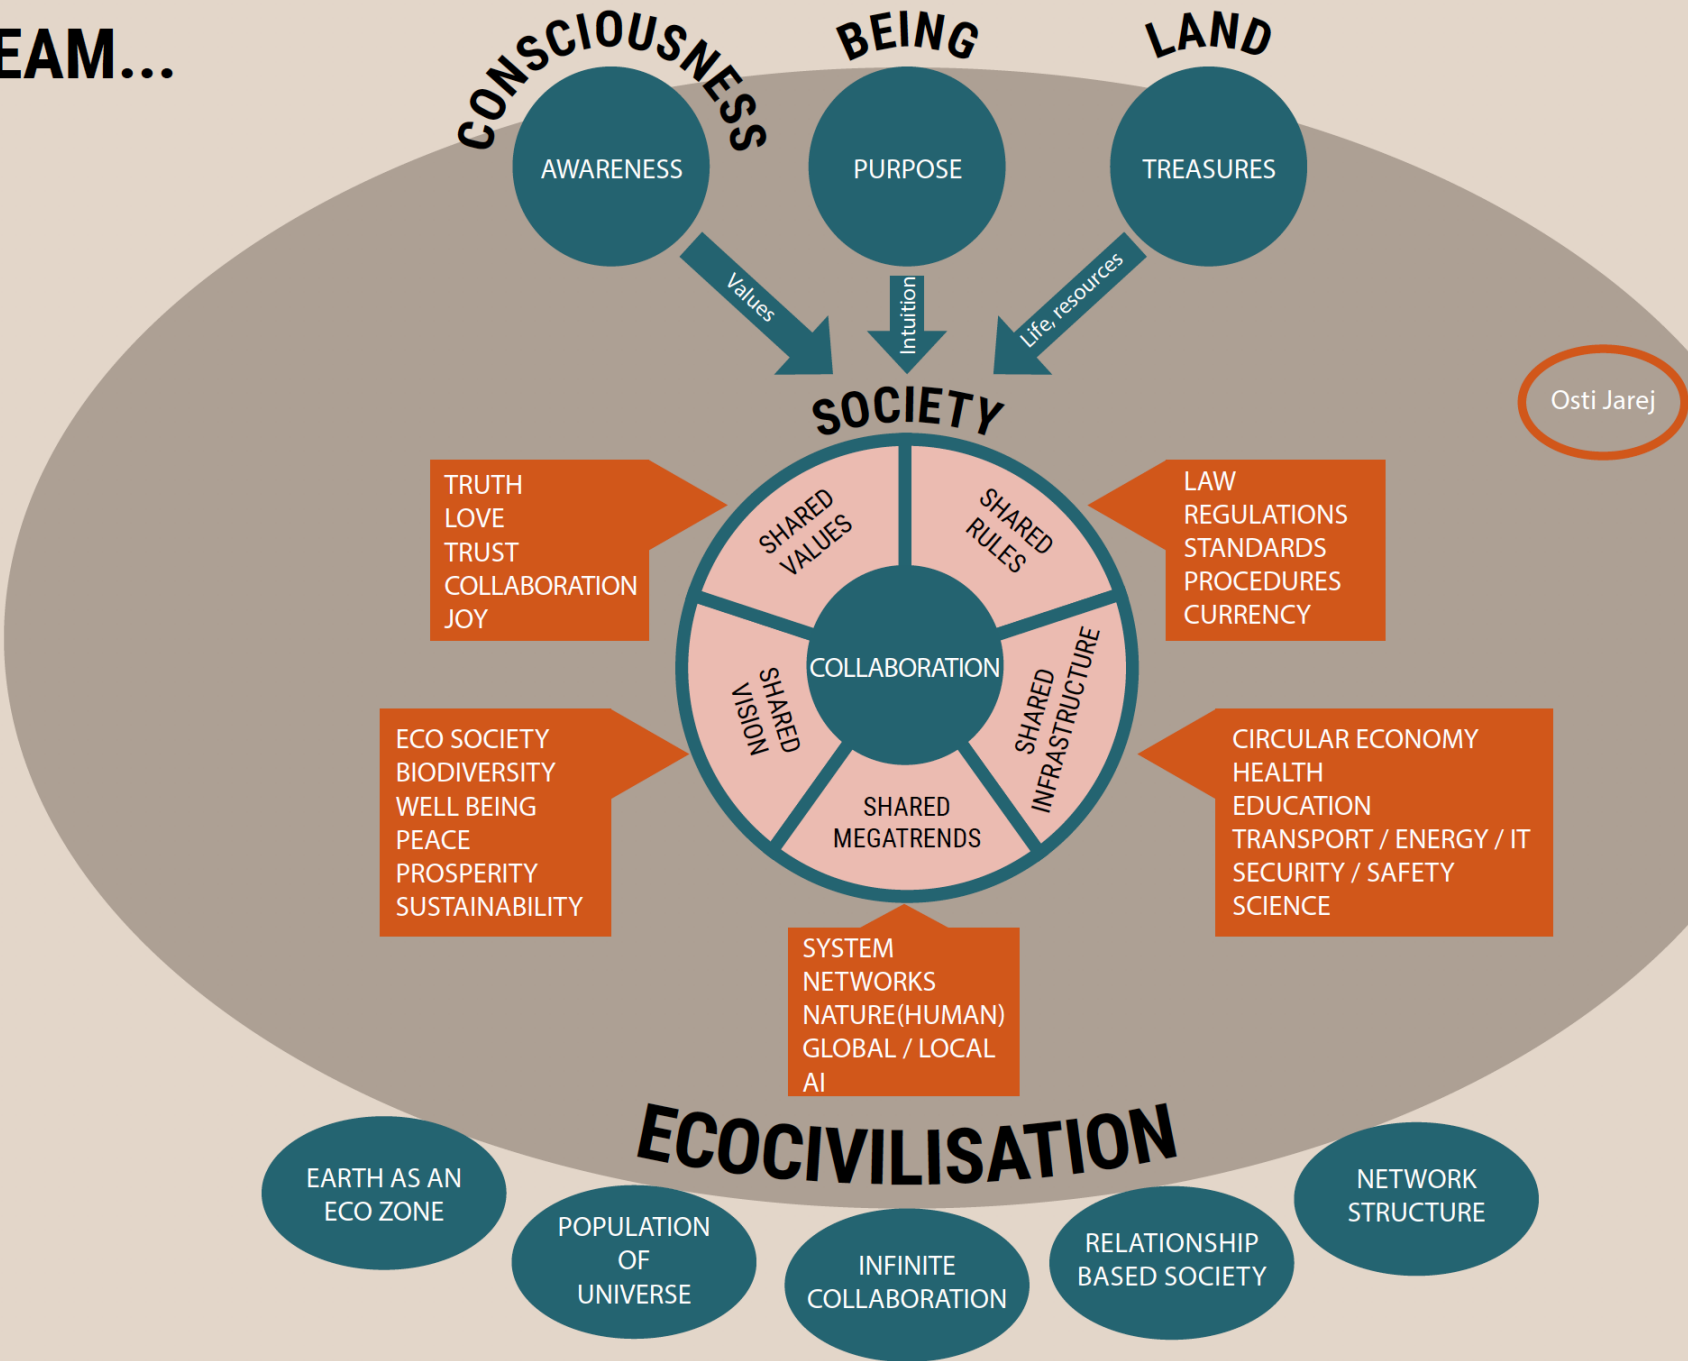

- From ego to eco
- From breakdown to breakthrough
- From competition to collaboration
- From capital growth based on the outside intervention to organic growth based on inner strength
- From hierarchy to networks
- From profits to shared value
- From cremation to care
- From functions to entities
- From static structures to dynamic networks
- From vertical/linear to relationship-based models
- From ownership to responsible use
- From destruction to cross-civilisational integration
- From individuals to Interconnectors
- From short term to long term strategies
- From isolation to integration
- From greed to distribution
- From local to global perspective,
- From fragmented to holistic action
- From close to open systems
