

THE FIRST YEAR OF THE CIRCULAR ASSESSMENT SCORE

Sebastian Žužek
Project Manager
Circular Business Academy

FEBRUARY 2021

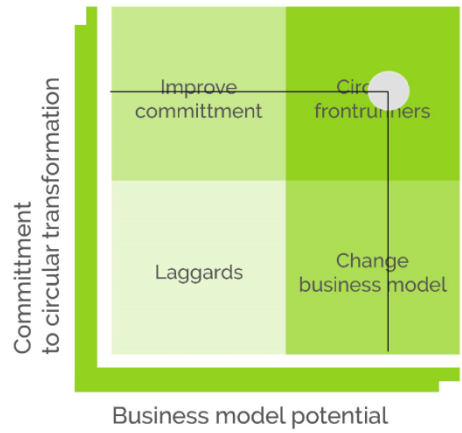

»This event is co-financed by the Ministry of Labour, Family, Social Affairs and Equal Opportunities and the European Union through the European Social Fund.«

One year of testing the Quick Circularity assessment score (QuCAS)

QuCAS Map

QuCAS Report

Company: Valtex
Country: Slovenia
Appraiser's name and surname: Niko Kumar

Circular Assessment Score

Circular business model potential:	40,2 out of 50
Commitment to the circular transformation:	37,5 out of 50
Total QuCAS :	77,7 out of 100

Your company is advanced in circular transformation.

According to the QuCAS score it is characterised as a **Circular Frontrunner**. Your organisation's business model demonstrates high potential and at the same time there has been a significant commitment given to the accomplishment of the circular transformation objectives.

Comment

Your company's circular model potential and the organisation's commitment justify substantial focus and investment in the implementation of its circular business model and demonstrates **low circular risk**.

Thank you for your participation at the Quick Circular Assessment.

Yours sincerely,

Descriptive statistics

Testing started on 28th January 2020

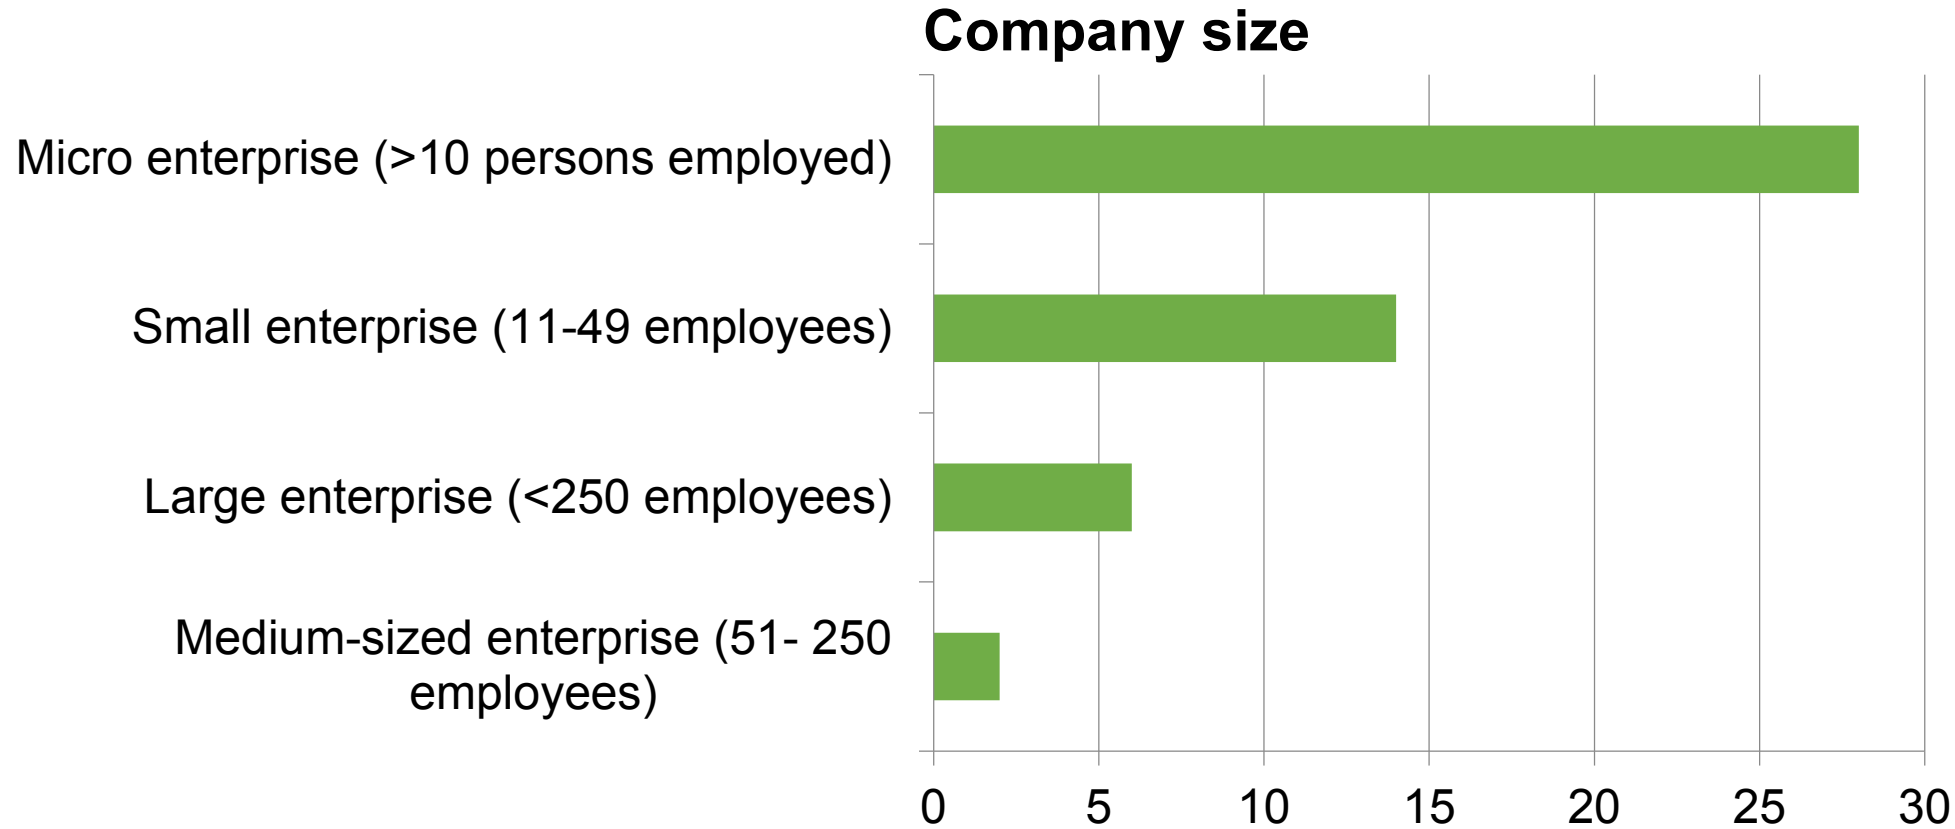

N= 50

International participation, mostly from Europe

Essential Statistics

Units	50	CORRELATION COEF.	0.596848	Upper quarter score over:	61.9
Av					
QuCAS	45.0	PEARSON	0.596848	No frontrunners	14
MEDIAN	44.7	RSQ	0.356227	% Frontrunners	28%

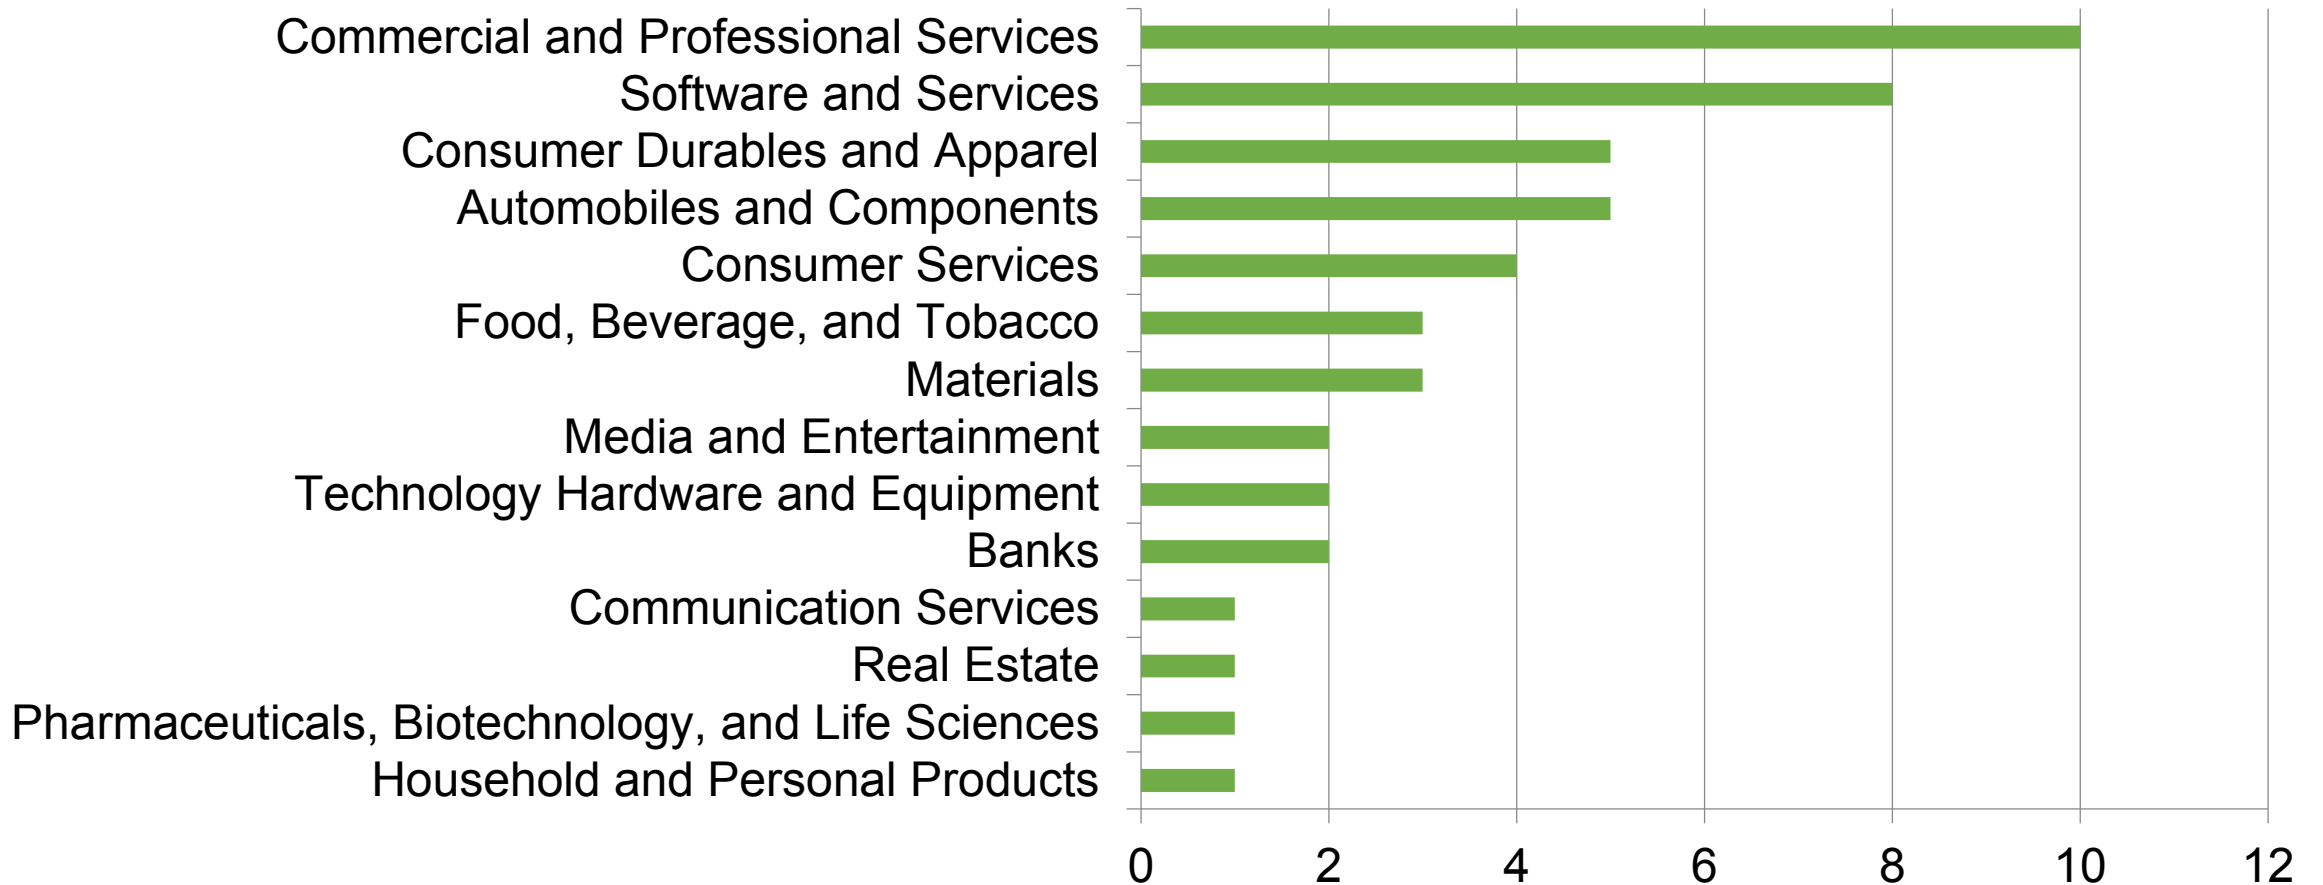

Respondents background

Respondents background

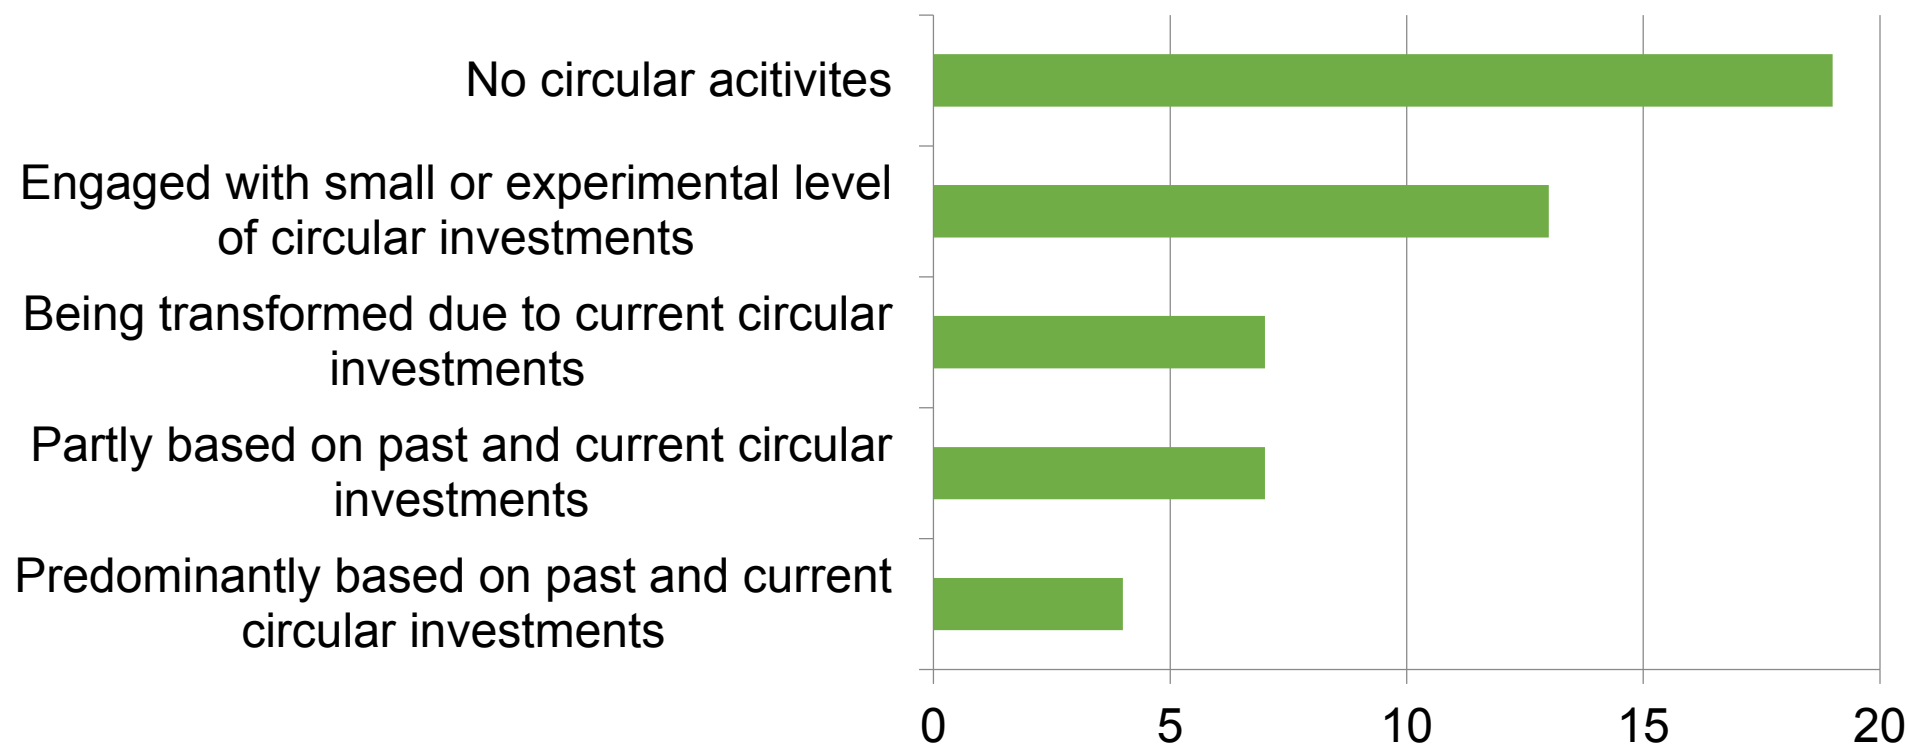

Industry

Respondents background

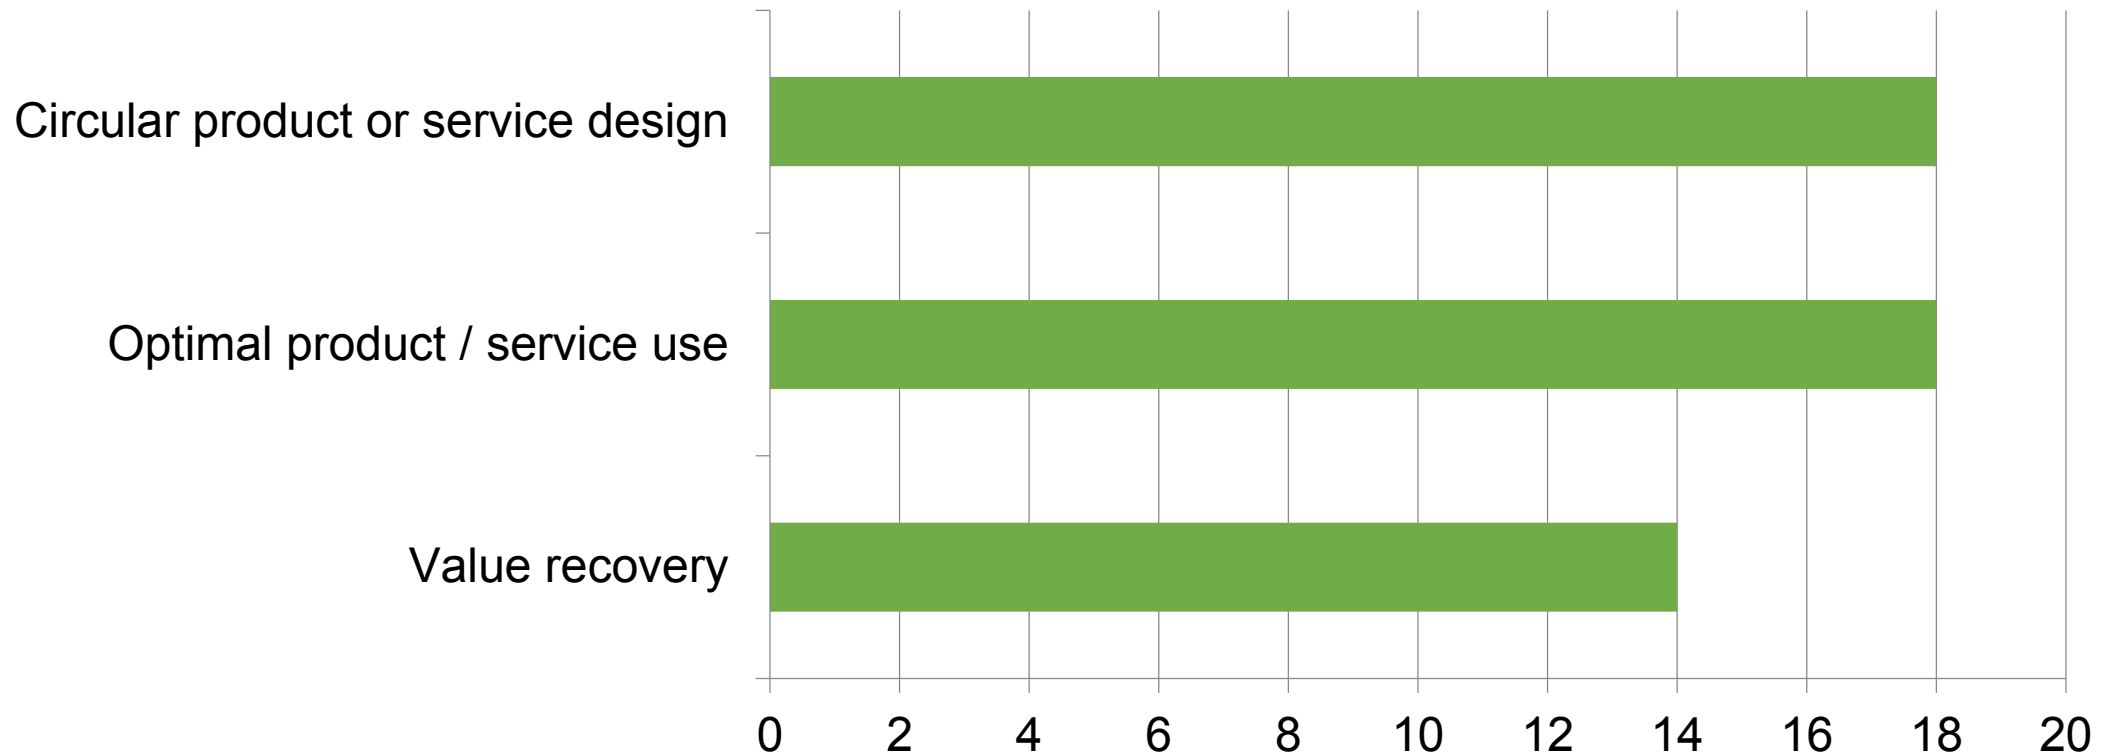

Level of circular activity

Primary focus and drivers of circular transformation

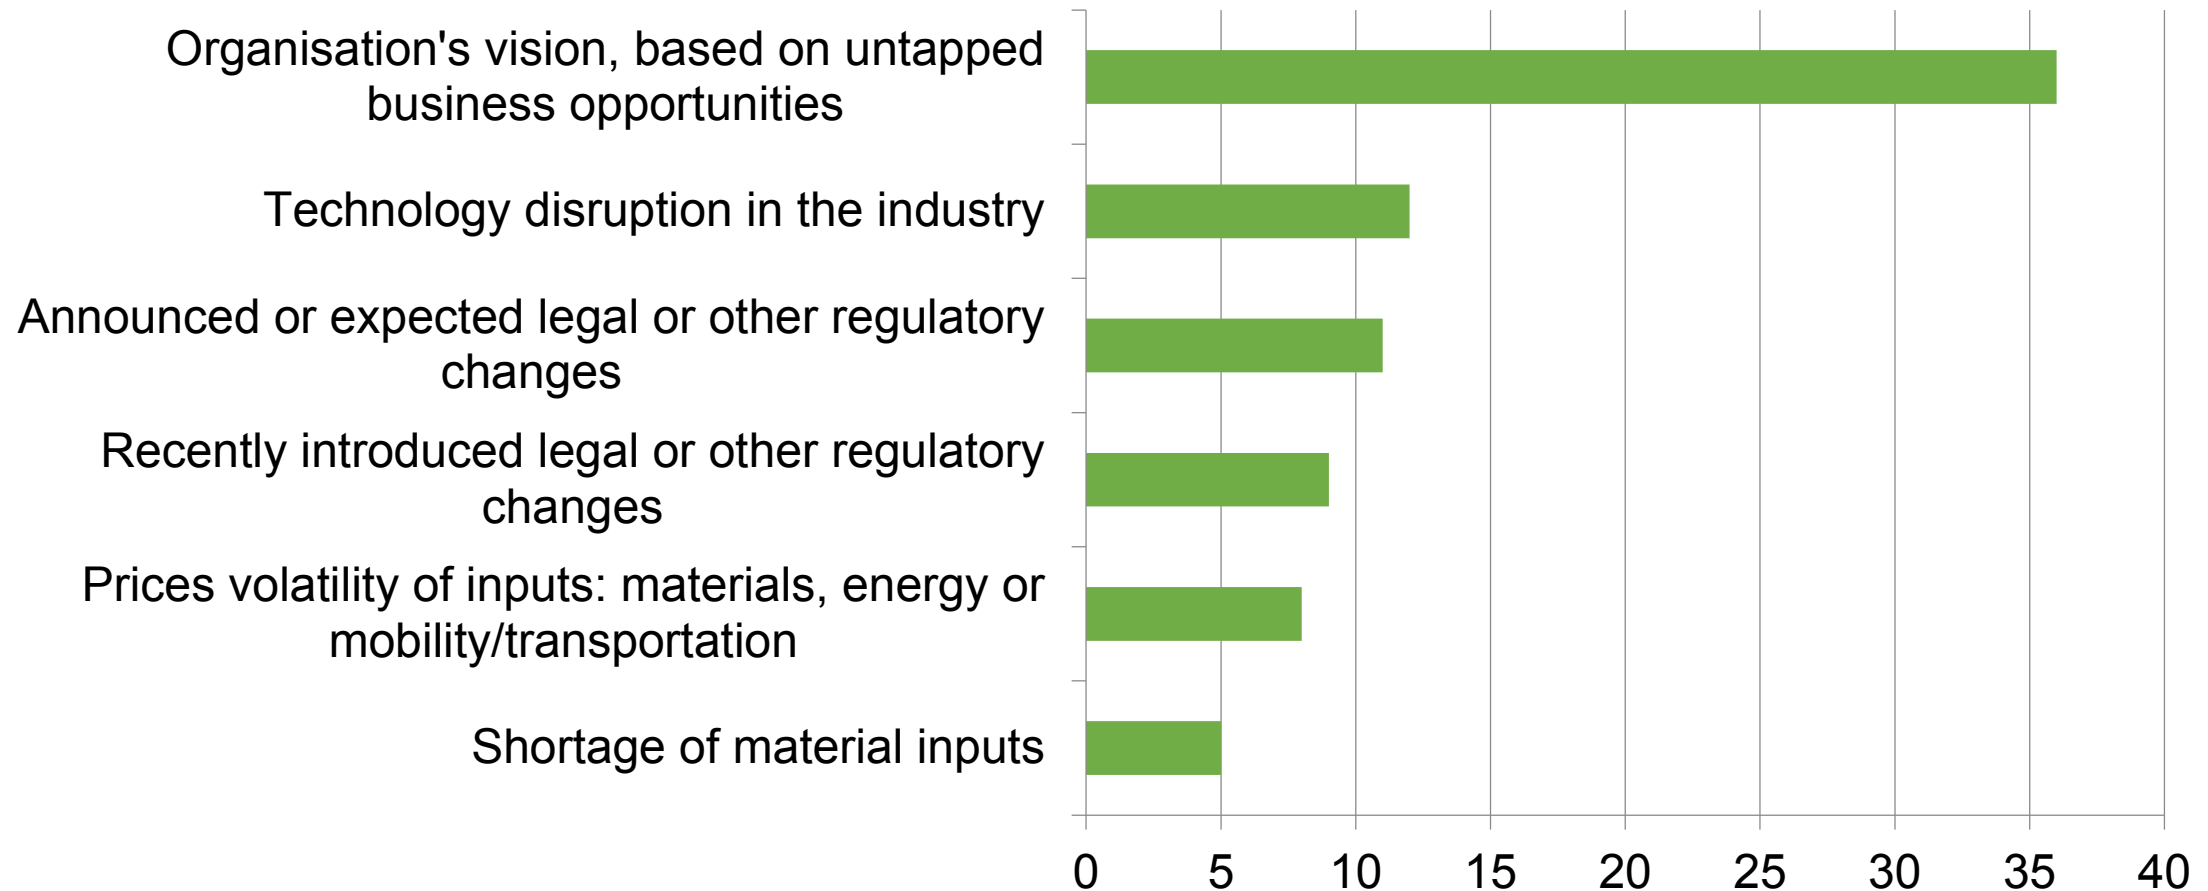

What is your organisation's primary focus in tackling the circular opportunities?

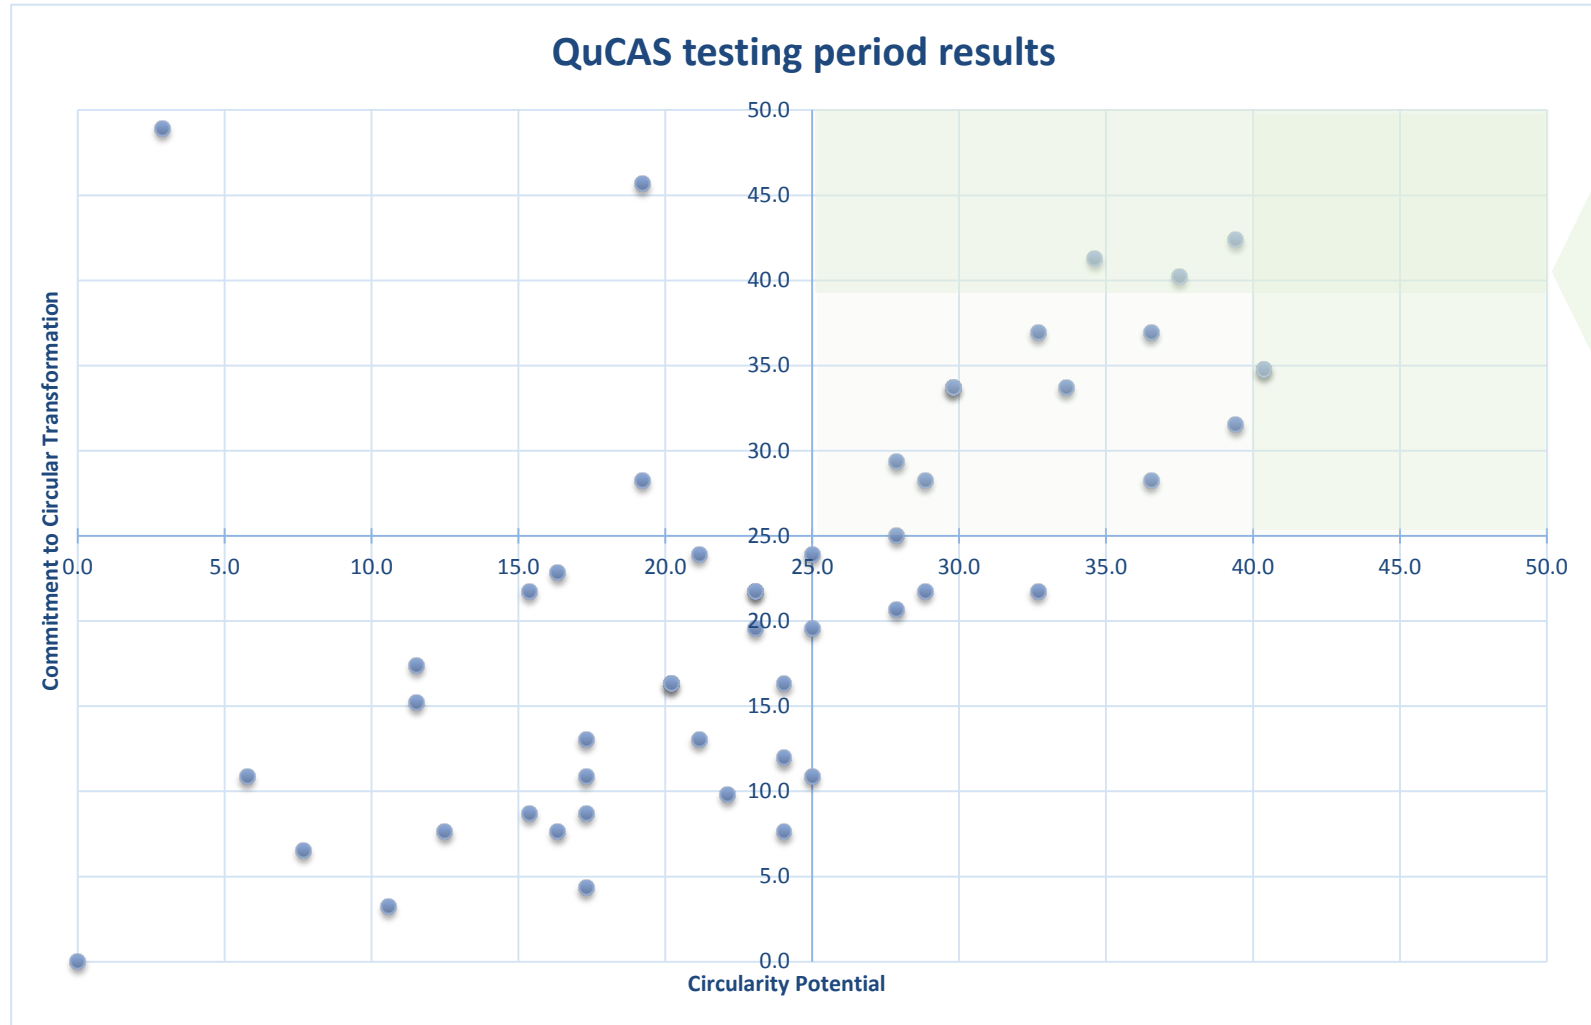

Primary focus and drivers of circular transformation

What are the primary drivers of your circular transformation?

THE CAS MATRIX

Circular frontrunners = 13 (26%)

Unexplored territory above partial scores of 40.0 points

Moderate Positive correlation

Correlation coef. = 0.596848

Average score of Commitment to circular transformation = 21.8/50

Average score of Business model potential = 23.2/50

Average total QuCAS Score = 45/100

Number of Circular frontrunners = 13 (26%)

Conclusions

Questionnaire clear and overall well understood.

- Minor textual improvements needed;
- Additional explanatory notes to be developed;
- Questionnaire enhancement upcoming: more background information, possibilities for additional data import and analysis;

Results overall confirmative:

- percentage of frontrunners similar to those of SID banka, expected favouring bias due to voluntary participation;

CAS Report to be improved with comparative statistics and augmented advisory service, including:

- industry comparisons;
- additional data imports (publicly available company information);
- increased relevance for transformation managers (overall company result and „breakthrough“ projects contribution to circularity), banks and other users;
- transformation guidelines (based on additional interview with ;

Observation point: the correlation between „Circular Potential“ and „Circular Comittment“, expected but too high a correlation is not desired. What is a „normal“ expected correlation?

Thank you.
